

Subject card

Subject name and code	Graph Data Presentations, PG_00044134						
Field of study	Mathematics						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Probability Theory and Biomathematics -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Magdalena Lemańska					
	Teachers	dr inż. Magdalena Lemańska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	15.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	The aim of the course is to familiarize students with the methods of data presentation using graph theory.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K7_K03] Can work as a team; understands the necessity of systematic work on all projects that are long-term in nature, understands and appreciates the importance of intellectual honesty in one's own activities and the activities of other people; behaves ethically.		Student knows the basics graph algorithms and knows how to use them. He can model certain phenomena using the Petri Nets. He knows different types of trees used in computer science. Can present data on flat graphs.			[SK2] Assessment of progress of work [SK5] Assessment of ability to solve problems that arise in practice	
	[K7_W05] Has enhanced knowledge of a selected branch of mathematics: knows most classical definitions and theorems and their proofs, Understands problems being examined, Knows relations between problems from particular field with other branches of mathematics, theoretical and applied		Student is able to use various programs (R, Neo4j) and modules built into them and program by himself using the above mentioned tools.			[SW3] Assessment of knowledge contained in written work and projects	
	[K7_U10] In a selected field, can examine evidence, in which, if necessary, also can use tools from other branches of mathematics, can identify one's own interests and develop them; in particular, is able to establish contact with specialists in their field, e.g. understand their lectures intended for young mathematicians.		The student lead some graph theory proofs using induction method. Can write the given algorithm in different programming languages.			[SU2] Assessment of ability to analyse information	

Subject contents	<p>1. How to save a graph in computer memory?</p> <p>2. Basic graph algorithms: Dijkstra algorithm, Floyd- Warshall algorithm, algorithms of flow in networks, traveling salesman problem, the problem of Chinese postman</p> <p>3. Petri nets.</p> <p>4 Graph isomorphism</p> <p>5. Planar graphs</p> <p>6. Different types of trees and their properties (spanning trees, decision trees, binary trees, arithmetics trees, algorithms concernig tres)</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="459 752 794 786">Subject passing criteria</th> <th data-bbox="802 752 1137 786">Passing threshold</th> <th data-bbox="1145 752 1469 786">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="459 797 794 819">Laboratory</td> <td data-bbox="802 797 1137 819">50.0%</td> <td data-bbox="1145 797 1469 819">33.0%</td> </tr> <tr> <td data-bbox="459 831 794 853">Project</td> <td data-bbox="802 831 1137 853">50.0%</td> <td data-bbox="1145 831 1469 853">33.0%</td> </tr> <tr> <td data-bbox="459 864 794 887">Final test</td> <td data-bbox="802 864 1137 887">50.0%</td> <td data-bbox="1145 864 1469 887">34.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Laboratory	50.0%	33.0%	Project	50.0%	33.0%	Final test	50.0%	34.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Laboratory	50.0%	33.0%													
Project	50.0%	33.0%													
Final test	50.0%	34.0%													
Recommended reading	Basic literature	<p>Geir Agnarsson, Raymond Greenlaw, Graph Theory: Modelling, Applications and Algorithms, Pearson Education Inc, 2007</p> <p>Wolfgang Reisig, Sici Petriego, WNT, 1988</p> <p>Jacek Wojciechowski, Krzysztof Pieńkosz, Grafy i sieci, PWN 2013</p>
