GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Lasers in Medicine, PG_00047930		
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering		
Date of commencement of studies	October 2023	Academic year of realisation of subject	2023/2024
Education level	second-cycle studies	Subject group	
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	1	ECTS credits	4.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Department of Metrology and Optoelectronics -> Faculty of Electronics, Telecommunications and Informatics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Jerzy Pluciński	
	Teachers	dr hab. inż. Jerzy Pluciński	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	0.0	15.0	0.0	0.0	45

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	45	4.0	51.0	100

Subject objectives

The aim of the course is to acquaint students with the principle of the construction and operation of the laser, the types and parameters of lasers used in medicine and the rules of their safe use, as well as the impact of the laser beam on the tissue using laser in therapy and diagnostics.

The aim of the course is also to acquire ability to measure the parameters of the laser beam.

Learning outcomes

Course outcome	Subject outcome	Method of verification

<table>
<tr><td>Subject contents</td><td>1. Introduction: the scope of the lecture, plan of lectures, literature, historical introduction.
2. Optical radiation and quantities associated with it.
3. Special features of the laser beam in comparison with the optical radiation from other sources.
4. Coherence time, coherence length, the coherence time of laser radiation.
5. Spatial coherence of laser radiation, the divergence of the laser beam, laser beam focusing.
6. Laser building blocks: optical amplifier, resonator, optics and electronics.
7. Absorption, spontaneous emission, stimulated emission, the amplification of the laser radiation, pumping methods of lasers.
8. Construction of an optical resonator – types of resonators.
9. Longitudinal modes and transverse modes of lasers.
10. Single-frequency lasers, tunable lasers.
11. Q-switched pulsed lasers and mode-locked lasers.
12. Types of lasers used in medicine – a continuous-wave lasers and pulse lasers.
13. Risks of laser radiation on the human body.
14. The maximum permissible exposure to continuous-wave and pulsed radiation – permissible doses.
15. Standards applicable to applications of lasers in medicine.
16. The use of lasers in medical diagnosis – introduction.
17. Transillumination.
18. Optical diffusion tomography.
19. Optical mammography.
20. Absorption spectroscopy of tissues.
21. Imaging using the acoustooptic phenomenon.
22. Photoplethysmography.
23. Laser-Doppler blood flow measurements.
24. The use of coherent sources in the diagnosis of tissue – optical coherence tomography (OCT).
25. Diagnosis of the eye by OCT.
26. The use of holography in medical diagnostics.
27. The use of lasers in medical treatment – introduction.
28. The use of lasers in surgery and microsurgery.
29. The use of lasers in cosmetic surgery and dermatology.
30. The use of lasers in the treatment of the retina.
31. The use of lasers in the correction of vision defects.
32. Methods for photodynamic treatment of cancer and skin diseases.
33. Development trends in medical applications of lasers.</td></tr>
<tr><td>Prerequisites and co-requisites</td><td>No requirements</td></tr>
<tr><td>Assessment methods and criteria</td><td><table>
<tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr>
<tr><td>Practical exercise</td><td>50.0%</td><td>40.0%</td></tr>
<tr><td>Midterm colloquium</td><td>50.0%</td><td>60.0%</td></tr>
