

Subject card

Subject name and code	CAD. Integrated Architectural Design, PG_00056907						
Field of study	Architecture						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2022/2023		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			blended-learning		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Visual Techniques -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	mgr inż. arch. Kacper Radziszewski					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	45.0	0.0	0.0	45
	E-learning hours included: 25.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		6.0		24.0	75
Subject objectives	During the course, students learn the methods of saving a project in the form of an algorithm using visual programming. Laboratories discuss the basic terms and methods of data recording, processing, visualization and a review of selected algorithms used in architectural design.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W02] knows and understands the rules of gathering information and their interpretation as a part of project concept preparation; detailed issues related to architecture and urban planning in the field of complex design problems solving	knows and understands the rules of gathering information and their interpretation as a part of project concept preparation			[SW3] Assessment of knowledge contained in written work and projects		
	[K7_U03] is able to prepare advanced graphic, written and oral presentation of own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design	is able to prepare advanced graphic, written and oral presentation of own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design			[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools		

Subject contents	<p>Classes on the design of facades with the use of computer programming. Classes using Rhinoceros + Grasshopper3d software. During the laboratory, students will work on the design of the curvilinear facade.</p> <p>Students in pairs or individually design the facade system, which will then be written in the form of an algorithm using Grasshopper3d. Each of the classes consists of two stages: introduction to a new issue in the software and the design part, during which students work on developing the algorithm. During the course, students will use additional grasshopper libraries such as LunchBox and Weaverbird.</p> <p>introduction to the content of the course and getting to know the Rhinoceros software interface + exercise introduction to Grasshopper3d software + exercise 2d algorithmic modeling (voronoi diagram) 3D algorithmic modeling (SANAA Pavilion) 3d algorithmic modeling (attractor) 3D modeling of rhinoceros surface and lunchbox accessory 3d modeling Grasshopper and Weaverbird add-on own work on the concept of the facade and record the design in the form of algorithm steps introduction to data visualization in Grasshopper3d working in Grasshopper3d on advanced detail modeling (part 1) working in Grasshopper3d on advanced detail modeling (part 2) work at Grasshopper3d on visualization and data export methods work in Grasshopper3d on the solution of the concept (online consultations during the classes) (alone or in pairs) work at Grasshopper3d on the solution of the concept (online consultations during classes) (alone or in pairs) work on presenting the project</p>											
Prerequisites and co-requisites	<p>Knowledge of CAD software.</p> <p>Knowledge of 3d modeling in any software.</p>											
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 889 794 920">Subject passing criteria</th> <th data-bbox="799 889 1141 920">Passing threshold</th> <th data-bbox="1145 889 1490 920">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 927 794 958">facade design</td> <td data-bbox="799 927 1141 958">70.0%</td> <td data-bbox="1145 927 1490 958">40.0%</td> </tr> <tr> <td data-bbox="453 965 794 987">laboratory reports</td> <td data-bbox="799 965 1141 987">70.0%</td> <td data-bbox="1145 965 1490 987">60.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	facade design	70.0%	40.0%	laboratory reports	70.0%	60.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
facade design	70.0%	40.0%										
laboratory reports	70.0%	60.0%
