

Subject card

Subject name and code	Complex steel structures, PG_00041057						
Field of study	Civil Engineering						
Date of commencement of studies	February 2024	Academic year of realisation of subject				2023/2024	
Education level	second-cycle studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	1	Language of instruction				English	
Semester of study	1	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Metal Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Aleksander Perliński				
	Teachers		dr inż. Natalia Korcz-Konkol dr inż. Aleksander Perliński dr hab. inż. Piotr Iwicki				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	15.0	0.0	60
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		35.0	100
Subject objectives	Knowledge and abilities upgrade connected with analysis and design of complex steel structures. Introduction to rules and methods related to fabrication, assembly and strengthening of steel structures.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W04] has knowledge on advanced strength of materials, modeling and optimisation of materials and constructions; has knowledge of fundamentals of Finite Element Method and general nonlinear analysis of engineering constructions and systems	Knows principles of steel structures stability analysis using computer methods			[SW1] Assessment of factual knowledge		
	[K7_W02] knows principles of analysis, design and dimensioning of complex constructions and its elements	Knows principles of design related to steel tall buildings, complex lattice structures, steel shell structures, masts, towers and chimneys. Knows methods of fabrication and assembly of metal structures. Knows principles of steel structure strengthening.			[SW1] Assessment of factual knowledge		
	[K7_U02] can design and dimension complex steel, concrete (including reinforced), wood and masonry constructions and its details	Can design steel floor beam, section class 4 plate girder and battened build-up column.			[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject		
	[K7_W14] knows and applies building codes and obeys the Construction Law; has knowledge on environmental impact of investment realisation	Knows and uses codes form Eurocode 3 series, in particular Parts: 1-1, 1-5 and 1-8			[SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>Lectures: Plate girders and elements in section class 4. Multi-storey steel frame buildings. Structural lattices. Trusses of tubular sections. Advanced stability of steel structures. Masts, towers and chimneys. Dynamics and fatigue of steel structures. Steel shell structures. Structures of aluminium alloys. Manufacturing of steel structures. Assembly of steel structures. Refurbishment and strengthening of steel structures</p> <p>Tutorials and project: Design of a steel floor beam. Design of a plate girder in section class 4. Design of a steel built-up column.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	written lecture test	60.0%	50.0%
	written tutorial test	60.0%	50.0%
Recommended reading	Basic literature	<ol style="list-style-type: none"> 1. PN-EN 1993-1-1 <i>Eurocode 3: Design of steel structures. Part 1-1: General rules and rules for buildings</i> 2. PN-EN 1993-1-5 <i>Eurocode 3: Design of steel structures. Part 1-5: Plated structural elements</i> 3. PN-EN 1993-1-8 <i>Eurocode 3: Design of steel structures. Part 1-8: Design of joints</i> 4.
