

Subject card

| | | | | | | | |
|---|---|--|---|-------------------------------------|---|------------|-----|
| Subject name and code | Mathematics, PG_00042221 | | | | | | |
| Field of study | Civil Engineering | | | | | | |
| Date of commencement of studies | February 2024 | Academic year of realisation of subject | | | 2023/2024 | | |
| Education level | second-cycle studies | Subject group | | | Obligatory subject group in the field of study | | |
| Mode of study | Full-time studies | Mode of delivery | | | at the university | | |
| Year of study | 1 | Language of instruction | | | English | | |
| Semester of study | 1 | ECTS credits | | | 5.0 | | |
| Learning profile | general academic profile | Assessment form | | | exam | | |
| Conducting unit | Department of Railway Engineering -> Faculty of Civil and Environmental Engineering | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | | dr Anita Milewska | | | | |
| | Teachers | | dr Anita Milewska | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 30.0 | 30.0 | 0.0 | 0.0 | 0.0 | 60 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | SUM |
| | Number of study hours | 60 | | 5.0 | | 60.0 | 125 |
| Subject objectives | Equipping a student with a specialized mathematical apparatus supporting technical subjects. | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | Method of verification | | |
| | [K7_U03] can perform classic statical and dynamical analysis of rod structures stability (trusses, frames and ties), both statically determined and undetermined as well as surface structures (plates, membranes and shells) | | The student combines knowledge in the field of mathematics with knowledge from other fields. | | [SU2] Assessment of ability to analyse information | | |
| | [K7_W01] has knowledge of higher mathematics, physics and chemistry, which is a base of subjects, such as construction theory and advanced material technology | | The student knows the basic concepts in the field of - differential and integral calculus, partial differential equations, tensor calculus. | | [SW1] Assessment of factual knowledge | | |
| | [K7_U06] is able to choose proper tools (measuring, analytical or numerical) to solve engineering problems, to acquire, filtrate, proces and analyse data | | The student determines the Fourier series of functions. The student uses Fourier series to solve partial differential equations. The student determines the inertia tensor. Student determines the eigenvalues and eigenvectors of linear operations and inertia tensors and interprets them. The student uses mathematical methods in the description of technical problems. | | [SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment | | |

| Subject contents | <p>Partial differential equations. Classifications of partial differential equations. Distinction of the second order partial differential equation. Elliptic, parabolic and hyperbolic equations. Applications of differential equations. Selected methods of solving partial differential equations. Elements of the variational account. Definition of a functional, definition of the extremum of a functional, basic lemma of a calculus of variations, Euler's equation, a precondition for the existence of an extremum of a functional, Jacobi's equation, Jacobi's condition. Conditions sufficient for the existence of the extreme of the functional. Tensor calculus. Matrices similar. Base in vector space. Matrix of transition from base to base. Linear operation and its matrix. Operation matrix when changing the base. Eigenvectors and eigenvectors of a linear operation and their determination. Tensor with a valence of 1 or 2. Tensor of inertia. Eigenvalues and eigenvectors of the inertia tensor. Invariants of changing the tensor base. Tensor quadric and its canonical form. Moments of inertia relative to a straight line. Strings and orthogonal series. Fourier series. Trigonometric Fourier series. Dirichlet conditions. Trigonometric Fourier series for even and odd functions. Application of the Fourier series for solving partial differential equations. Operator methods. Laplace transform. Basic properties of Laplace transform. Convolution of functions. Borel's theorem. Application of operator methods, including solving differential equations.</p> | | | | | | | | | | | | | | |
|--|---|--|--|--------------------------|-------------------|-------------------------------|------------------|-------|-------|------------------|-------|-------|------|-------|-------|
| Prerequisites and co-requisites | Knowledge in the field of mathematical analysis, algebra, vector calculus, ordinary differential equations. | | | | | | | | | | | | | | |
| Assessment methods and criteria | <table border="1" data-bbox="451 730 1487 860"> <thead> <tr> <th data-bbox="451 730 794 763">Subject passing criteria</th> <th data-bbox="794 730 1137 763">Passing threshold</th> <th data-bbox="1137 730 1487 763">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 763 794 797">Colloquium No. 1</td> <td data-bbox="794 763 1137 797">55.0%</td> <td data-bbox="1137 763 1487 797">20.0%</td> </tr> <tr> <td data-bbox="451 797 794 831">Colloquium No. 2</td> <td data-bbox="794 797 1137 831">55.0%</td> <td data-bbox="1137 797 1487 831">20.0%</td> </tr> <tr> <td data-bbox="451 831 794 860">Exam</td> <td data-bbox="794 831 1137 860">55.0%</td> <td data-bbox="1137 831 1487 860">60.0%</td> </tr> </tbody> </table> | | | Subject passing criteria | Passing threshold | Percentage of the final grade | Colloquium No. 1 | 55.0% | 20.0% | Colloquium No. 2 | 55.0% | 20.0% | Exam | 55.0% | 60.0% |
| Subject passing criteria | Passing threshold | Percentage of the final grade | | | | | | | | | | | | | |
