

Subject card

Subject name and code	Complex metal structures, PG_00041065						
Field of study	Civil Engineering						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Metal Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Elżbieta Urbańska-Galewska					
	Teachers	dr hab. inż. Elżbieta Urbańska-Galewska dr inż. Aleksander Perliński dr inż. Natalia Korcz-Konkol dr inż. Witold Knabe mgr inż. Paweł Pieczka					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	15.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		35.0	100
Subject objectives	To acquaint students with the structures of high-rise buildings, tanks, masts, chimneys, and towers as well as advanced methods of steel structure analysis.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W02] knows principles of analysis, design and dimensioning of complex constructions and its elements	The student learns the principles of analysis, construction, and dimensioning of elements of complex metal structures			[SW3] Assessment of knowledge contained in written work and projects		
	[K7_W04] has knowledge on advanced strength of materials, modeling and optimisation of materials and constructions; has knowledge of fundamentals of Finite Element Method and general nonlinear analysis of engineering constructions and systems	Students know the principles of designing structures in a post-critical state			[SW3] Assessment of knowledge contained in written work and projects		
	[K7_U02] can design and dimension complex steel, concrete (including reinforced), wood and masonry constructions and its details	The student can design elements and complex metal structures			[SU1] Assessment of task fulfilment		
	[K7_W14] knows and applies building codes and obeys the Construction Law; has knowledge on environmental impact of investment realisation	Students design steel structure elements using appropriate standards of environmental and operational impact on structures as well as standards for the design of steel structures			[SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>Load-bearing of steel structures elements in the postcritical state.</p> <p>Dimensioning of steel plate girders. Spatial lattice structure. Design and shaping of hollow section structures.</p> <p>Models and analysis of steel structure, Multi-storey buildings structures examples of implementation.</p> <p>Types of tanks. Tanks for liquid fuels the relationship between the properties of the fuel and the type of tank,</p> <p>Design of vertical cylindrical tanks.</p> <p>Prestressed steel structures - the aim, materials and construction.</p> <p>Metal sheeting acting as a diaphragm.</p> <p>Chimneys, towers, masts - general characteristics, types, static calculation, design solutions.</p>																	
Prerequisites and co-requisites																		
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 786 794 815">Subject passing criteria</th> <th data-bbox="799 786 1141 815">Passing threshold</th> <th data-bbox="1145 786 1492 815">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 822 794 851">design of the steel floor</td> <td data-bbox="799 822 1141 851">60.0%</td> <td data-bbox="1145 822 1492 851">8.0%</td> </tr> <tr> <td data-bbox="453 857 794 887">active participation in classes</td> <td data-bbox="799 857 1141 887">0.0%</td> <td data-bbox="1145 857 1492 887">12.0%</td> </tr> <tr> <td data-bbox="453 893 794 990">Summary assessment of tests and quizzes concerning the lecture content carried out during the semester</td> <td data-bbox="799 893 1141 990">60.0%</td> <td data-bbox="1145 893 1492 990">50.0%</td> </tr> <tr> <td data-bbox="453 996 794 1025">Colloquium concerning exercises</td> <td data-bbox="799 996 1141 1025">60.0%</td> <td data-bbox="1145 996 1492 1025">30.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	design of the steel floor	60.0%	8.0%	active participation in classes	0.0%	12.0%	Summary assessment of tests and quizzes concerning the lecture content carried out during the semester	60.0%	50.0%	Colloquium concerning exercises	60.0%	30.0%
Subject passing criteria	Passing threshold	Percentage of the final grade																
design of the steel floor	60.0%	8.0%																
active participation in classes	0.0%	12.0%
