

Subject card

Subject name and code	Thesis Seminar , PG_00041398						
Field of study	Civil Engineering						
Date of commencement of studies	February 2024			Academic year of realisation of subject		2024/2025	
Education level	second-cycle studies			Subject group		Optional subject group	
Mode of study	Full-time studies			Mode of delivery		at the university	
Year of study	2			Language of instruction		Polish	
Semester of study	3			ECTS credits		3.0	
Learning profile	general academic profile			Assessment form		assessment	
Conducting unit	Department of Concrete Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor			prof. dr hab. inż. Krystyna Nagrodzka-Godycka			
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	45.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	The student learns the rules of developing a master's diploma. He gets acquainted with scientific and technical literature related to the topic of work and current engineering solutions in civil engineering. He can formulate a problem, choose the right methods of solution, and use modern design tools. He can present the main issues related to the solutions he has adopted, he can discuss and draw conclusions from a public discussion in a group.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K7_W02] knows principles of analysis, design and dimensioning of complex constructions and its elements		The student is able to formulate and present opinions on reinforced concrete structures				
	[K7_W15] has deep and adequate knowledge of civil engineering, within offered specialization and profile		The student is able to formulate and present opinions on reinforced concrete structures				
	[K7_K02] Recognizes the significance of knowledge in solving cognitive and practical problems; reliably evaluates results of his own and team research		The student is able to present, on the basis of literature, the issue of reinforced concrete structures regarding the diploma thesis				
	[K7_U15] has advanced skills in civil engineering within offered specialization/profile		The student has an extended knowledge of reinforced concrete structures.				
Subject contents	Presentation of the progress of the thesis and discussion of emerging problems.						
	Presentation of current scientific and technical problems related to reinforced concrete structures.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade	
	Presentation of the diploma		50.0%			100.0%	
Recommended reading	Basic literature			Current scientific and technical literature			
	Supplementary literature			see above			
	eResources addresses			Adresy na platformie eNauczenie:			

Example issues/ example questions/ tasks being completed	
Work placement	Not applicable
