

## Subject card

Subject name and code	LIGHT MATAL STRUCTURES, PG_00042239						
Field of study	Civil Engineering						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Metal Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Elżbieta Urbańska-Galewska					
	Teachers	dr inż. Natalia Korcz-Konkol dr hab. inż. Elżbieta Urbańska-Galewska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	5.0		25.0		75
Subject objectives	To acquaint students with the principles of designing steel structures made of cold-bent sections, plate girders with profiled webs, castellated beams and aluminum sections						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W02] knows principles of analysis, design and dimensioning of complex constructions and its elements	The student knows the principles of advanced analysis of light metal structures (including elements made of cold-fold sections) and aluminum			[SW1] Assessment of factual knowledge		
	[K7_U02] can design and dimension complex steel, concrete (including reinforced), wood and masonry constructions and its details	The student can design elements of cold-formed sections			[SU1] Assessment of task fulfilment		
	[K7_W14] knows and applies building codes and obeys the Construction Law; has knowledge on environmental impact of investment realisation	The student knows standards for the design of cold-bent steel structures and aluminum structures			[SW1] Assessment of factual knowledge		

Subject contents	<p><b>Content of lectures:</b></p> <p>Definition of light metal structures, scope of the subject</p> <p>Theoretical basis of cold formed sections design.</p> <p>Bearing capacity of cold-formed elements under compression and bending</p> <p>Connectors and connections in structures with cold-formed profiles.</p> <p>Stress skin design.</p> <p>Structural systems with cold formed profiles.</p> <p>Roof renovations using light steel construction</p> <p>Plates with corrugated webs. Castellated beams.</p> <p>Aluminum structures.</p> <p><b>Content of exercises:</b></p> <p>General rules in accordance with EN 1993-1-3</p> <p>Idealized cross-section (working example)</p> <p>Rules for distortional buckling calculation (working example)</p> <p>Axial compression, tension and bending resistance calculations (working examples)</p> <p>Shear force (working example)</p> <p>Local transverse forces (working example)</p> <p>Combined tension and bending</p> <p>Working example on purlin connected to the roof sheathing by self-drilling screw</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="454 1751 794 1778">Subject passing criteria</th> <th data-bbox="798 1751 1137 1778">Passing threshold</th> <th data-bbox="1141 1751 1482 1778">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="454 1783 794 1809">Colloquium</td> <td data-bbox="798 1783 1137 1809">60.0%</td> <td data-bbox="1141 1783 1482 1809">40.0%</td> </tr> <tr> <td data-bbox="454 1814 794 1841">Exam</td> <td data-bbox="798 1814 1137 1841">60.0%</td> <td data-bbox="1141 1814 1482 1841">60.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Colloquium	60.0%	40.0%	Exam	60.0%	60.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Colloquium	60.0%	40.0%										
Exam	60.0%	60.0%
