

Subject card

Subject name and code	CORROSION PROTECTION OF METAL STRUCTURES, PG_00041294						
Field of study	Civil Engineering						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Metal Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Dariusz Kowalski				
	Teachers		dr inż. Dariusz Kowalski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	The purpose of the course is acquaint students with the problem of corrosion of metal parts causing loss of capacity, stability or functionality of technical systems. Types of corrosion will be presented and the process of their course. Will discuss ways to protect the metal from corrosion by coatings and metallization. Students learn the process of selection of the corrosion protection system for the selected components.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W15] has deep and adequate knowledge of civil engineering, within offered specialization and profile	The student knows the causes and conditions of corrosion development. He can choose a material protection system against negative corrosion phenomena			[SW1] Assessment of factual knowledge		
	[K7_W10] knows modern building materials as well as technologies and methods of its manufacturing and production of construction elements	The student knows the types of materials and methods used to protect the structure from corrosion			[SW1] Assessment of factual knowledge		
	[K7_W14] knows and applies building codes and obeys the Construction Law; has knowledge on environmental impact of investment realisation	The student got acquainted with the standard approach to the assessment of corrosive conditions and methods of material protection			[SW1] Assessment of factual knowledge		
	[K7_U15] has advanced skills in civil engineering within offered specialization/profile	The student knows how to assess corrosive exposure and choose the appropriate protection			[SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	<p>Program content of the lecture:</p> <p>Methods of corrosion protection - protection coating, modification corrosive environment, electrochemical protection, selection of a metallic material, shape the structure and corrosion. Preparation of steel surfaces for the application of protective coatings. Surface contamination, surface preparation to clean. Methods for cleaning surfaces - abrasive used in blasting - abrasive. Evaluation of the quality of surface preparation for painting, surface roughness. Division and characteristics of painting. Techniques for applying paint products. Metallized coating. Evaluation and testing of coatings. Disadvantages of paints and coatings and metallization. Designing corrosion protection according to PN- EN ISO 12944. Designing corrosion protection according to PN- EN ISO 12944. Electrochemical corrosion protection. Examples of corrosion protection of selected structures . Health and safety in the work of anticorrosive.</p> <p>Exercise Program content:</p> <p>Discussion on the scope and principles of the object. Corrosion around us - to discuss homework. Traps corrosion - work with the album Steel Structures. Corrosion around us - the students own work. Traps corrosion - work with the album Steel Structures. Corrosion around us - the students own work. Corrosion around us - the students own work . Presentation of students chosen from the range to discover corrosion. Description of the environment for their own cases. Classification corrosive environment for the cases of their own. Prepare design for galvanizing - work with the album Steel Structures. Selection of corrosion protection system for cases of their own. Selection of corrosion protection system for cases of their own. Selection of commercial protective coating.</p>											
Prerequisites and co-requisites	Basis of design and shaping of metal structures.											
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="448 898 794 931">Subject passing criteria</th> <th data-bbox="794 898 1141 931">Passing threshold</th> <th data-bbox="1141 898 1487 931">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 931 794 965">Design exercises</td> <td data-bbox="794 931 1141 965">60.0%</td> <td data-bbox="1141 931 1487 965">20.0%</td> </tr> <tr> <td data-bbox="448 965 794 1003">Test</td> <td data-bbox="794 965 1141 1003">60.0%</td> <td data-bbox="1141 965 1487 1003">80.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Design exercises	60.0%	20.0%	Test	60.0%	80.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Design exercises	60.0%	20.0%										
Test	60.0%	80.0%										
Recommended reading	Basic literature	<ol style="list-style-type: none"> 1. PN EN ISO 12944 - Paints and varnishes - Corrosion protection of steel structures by protective paint systems - Part. 1-7 2. PN EN ISO 1461 Zinc coatings applied to steel by immersion (galvanizing unit) - Requirements and testing 3. BS EN ISO 8501 - Preparation of steel substrates before application of paints and related products. Visual assessment of surface cleanliness. Part 1. Rust grades and preparation grades of uncoated steel substrates and of steel substrates after overall removal of previous coatings. Part 2 preparation of previously coated steel substrates after localized removal of previous coatings.
