

Subject card

Subject name and code	Hydro and Marine Engineering [L], PG_00045889						
Field of study	Civil Engineering						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Hydraulic Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Witold Sterpejkowicz-Wersocki					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	5.0		35.0		100
Subject objectives	Understanding the principles and ways of using the hydroelectric resources of rivers.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_U14] is able to plan and to interpret the geotechnical investigations, to analyse the foundation stability; can design direct and deep foundations in complex soil conditions for complicated static and dynamical loads	The student is able to design and check the stability of the foundation of the weir and hydroelectric power plant.			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	[K7_W14] knows and applies building codes and obeys the Construction Law; has knowledge on environmental impact of investment realisation	The student knows and can apply the provisions related to technical conditions, which hydrotechnical constructions and their location should meet.			[SW1] Assessment of factual knowledge		
	[K7_W11] has deep knowledge of marine and inland hydrotechnical constructions; has knowledge about hydraulic and hydrological constraints in design and exploitation of buildings	The student describes the principles of selecting the power of hydropower plants and designing intakes and bringing water to the power plant building. The student analyzes the selection of the type of water turbine and the basic electrical and mechanical equipment of the hydroelectric power plant. The student explains the role and importance of hydropower in regulating the power system.			[SW1] Assessment of factual knowledge		
[K7_W15] has deep and adequate knowledge of civil engineering, within offered specialization and profile	The student deepens knowledge in the field of hydraulic engineering and learns the principles of operation of hydropower plants.			[SW1] Assessment of factual knowledge			

Subject contents	<p>LECTURE. Sources and resources of the primary energy of the world. Potential and technical water and energy resources of the world and Poland. The share of hydropower in the production of electricity in the world and Poland. Historical view of use of hydropower. The development of water turbines. Types of hydropower plants (flow, reservoir and pumped-storage). Power selection of hydropower plants. Rules for selecting a turbine, and similarity of water turbines. Actional and reactional water turbines (Pelton, Francis, Kaplan, Deriaz, propeller type). Characteristics of water turbines. Hydroelectric equipment: generators, speed transmissions, power regulators, flywheels, transformers. Solutions of hydroelectric plants. Power channels and pressure pipelines. Hydraulic losses on the water intake to the power plant, on the grates and on the water turbine. Balancing chambers. Small hydropower plants. Water power plant functions in the power system. Selection of basic parameters of earth dams.</p> <p>PROJECT: Project of a flow hydropower plant with a weir. Selection of power, type of turbine and equipment of the hydropower plant.</p>														
Prerequisites and co-requisites	Knowledge in the field of Hydraulic Engineering or Hydro & Marine Civil Engineering.														
Assessment methods and criteria	<table border="1" data-bbox="456 586 1482 721"> <thead> <tr> <th data-bbox="456 586 794 622">Subject passing criteria</th> <th data-bbox="794 586 1145 622">Passing threshold</th> <th data-bbox="1145 586 1482 622">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 622 794 658"></td> <td data-bbox="794 622 1145 658">60.0%</td> <td data-bbox="1145 622 1482 658">40.0%</td> </tr> <tr> <td data-bbox="456 658 794 694"></td> <td data-bbox="794 658 1145 694">60.0%</td> <td data-bbox="1145 658 1482 694">20.0%</td> </tr> <tr> <td data-bbox="456 694 794 721"></td> <td data-bbox="794 694 1145 721">75.0%</td> <td data-bbox="1145 694 1482 721">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade		60.0%	40.0%		60.0%	20.0%		75.0%	40.0%
