

## Subject card

Subject name and code	Management and Environmental Monitoring, PG_00060013								
Field of study	Environmental Engineering								
Date of commencement of studies	February 2024		Academic year of realisation of subject			2024/2025			
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific			
						research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			English			
Semester of study	3		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Enviro	eering Technology -> Faculty of Civil			and Environmental Engineering				
Name and surname	Subject supervisor	Subject supervisor prof. dr hab. inż. Magdalena Gaje				vska			
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	boratory Project		Seminar	SUM	
	Number of study hours	15.0	15.0	0.0	15.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	earning activity Participation in classes include plan				Self-study		SUM	
	Number of study 45 hours		5.0		30.0		80		
Subject objectives	The aim of the course is to familiarize students with the principles of monitoring and assessing the quality of individual elements of the environment and the principles of environmental management with an indication of future challenges.								
Learning outcomes	Course out	come	Subject outcome			Method of verification			
	K7_W03		Has in-depth, structured and theoretically based knowledge related to measurement, management and environmental monitoring			[SW2] Assessment of knowledge contained in presentation			
	K7_U03		Is able to prepare detailed documentation of the results of an experiment or research			[SU5] Assessment of ability to present the results of task			
	critically evaluate them, draw conclusions, and formulate and		can obtain information from literature, databases and other sources; is able to integrate obtained information, interpret and critically evaluate it, as well as draw conclusions and formulate and comprehensively justify opinions			[SU5] Assessment of ability to present the results of task			
	[K7_W08] has knowledge necessary to understand the social, economic, legal and other non-technical determinants of engineering activities and their incorporation in engineering practice		has the knowledge necessary to understand social, economic, legal and other non-technical conditions of engineering activities and to take them into account in engineering practice			[SW2] Assessment of knowledge contained in presentation			
	[K7_U08] is able to assess risks in the implementation of engineering projects and implement appropriate safety rules		is able to assess threats in the implementation of engineering projects			[SU2] Assessment of ability to analyse information

Subject contents	The subject is dedicated to two issu-	es:					
	·						
	1. First is monitoring of the environment- different component of the environment like water, air, soil and its reliability. The monitoring of water bodes is discused based on Water Framework Directive 2000/60/EU. Air						
	Chemistry, Pollutions, Monitoring and Control.						
	Case study of Air Quality Index based on air quality monitoring in different cites is elaborated with in the						
	practical exercise.						
	·						
	2. Second is management and cover	ers:					
	Historical development of environmental strategies for protection and management, regulations, demands,						
	needs as well as tools and strategies like clean technologies, LCA, issues contacted to climate change and mitigation of its; City resilience and demand for future to cope with climate change. Examples of adaptation and mitigation actions on different levels personal (individual), municipal and governmental are the issue for practical exercise.						
	The importance and challenges for wastewater management in circular economy. The IWA pronciples for Water Wise Cities as well as Water Sensitive Urban Designe (WSLID) and Blue Green Drem appouche are						
	Water Wise Cities as well as Water Sensitive Urban Designe (WSUD) and Blue Green Drem aprouche are disscused with in the issue of modern stormwater managmernt in Cites 2050. Nature Based solution as a tool for sustainable eneviramomant management are discused based on Treatment wetland for water pollution control cases.						
Dronomicitos							
Prerequisites and co-requisites							
·		1					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	preparation of the presentation	60.0%	100.0%				
Recommended reading	Basic literature	Gajewska M. (2019). Złoża hydrofitowe z pionowym przepływem					
	ścieków. Charakterystyka procesów i zastosowań. Monogra Komitetu Inżynierii Środowiska PAN nr 150, Warszawa 2019:						
	Komitetu inzynieni Srodowiska PAN nr 150, Warszawa 2019:309s						
						Wetland Technology, Practical Information on the Design and	
			Application of Treatment Wetlands ed G. Lungergraber , G. Dotro, J. Nivala, A. Rizzo, O. Stein				
	Supplementary literature	laws and regulations and https://naukaoklimacie.pl/					
	eResources addresses	Adresy na platformie eNauczanie:					
Example issues/							
example questions/	Technologies for recovery of bioavailable phosphorus compounds - phosphorus in the environment,						
tasks being completed	resources, needs2. Regional monitoring on the example of the Pomeranian Voivodeship3. Carbon dioxide - sources of emissions, ways to reduce them, the greenhouse effect, truth and myths4. Rules for monitoring groundwater and surface waters. Surface water classification systems in Poland and the EU5. Smart Cities - challenges and opportunities6. Reclamation of water reservoirs - goals, methods, restrictions						
	Net appliaghle						
Work placement	Not applicable
