

Subject card

Subject name and code	, PG_00059966						
Field of study	Environmental Engineering						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Sanitary Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Sylwia Fudala-Książek					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	15.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	5.0		38.0		103
Subject objectives	The aim of the course is to introduce the subject of mechanical ventilation and air conditioning for domestic buildings. In particular, with the knowledge of ventilation and air conditioning and the shaping of the indoor environment, the basics of acoustics, current legal regulations and standards related to the subject, installation materials and criteria for their selection, design methods and tools supporting design, methods and technologies for the execution of the installations in question, as well as related non-technical conditions.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K7_W06	Students will list and define terms concerning the flow of media in sanitary systems, thermal or energy systems. Characterises methods and equipment for media flow in sanitary, thermal or energy systems, including mechanical ventilation.			[SW1] Assessment of factual knowledge		
	K7_W04	The student carries out design documentation covering the application of automation in ventilation and air-conditioning systems. The student is able to present solutions to complex engineering tasks in the field of designing, modelling, optimisation, control of processes, objects and systems in environmental engineering.			[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
	K7_U03	The student produces design documentation for a mechanical ventilation system, including technical description, calculations and drawings.			[SU1] Assessment of task fulfilment		
	K7_U10	Student designs a mechanical ventilation system in a building.			[SU1] Assessment of task fulfilment		

Subject contents	<p>LECTURES: Ventilation airflow and its properties. Organisation of room air exchange, air distribution in ventilated rooms. Characteristics of ventilation and air conditioning systems. Air treatment. Air recirculation and heat recovery. Equipment components of mechanical ventilation and air conditioning systems - ducts, fittings and devices. Ventilation and air conditioning units. Dimensioning of mechanical ventilation duct networks. Basics of acoustics. Legal regulations, standards, technical, construction and fire requirements.</p> <p>EXERCISES: Calculation of ventilation air treatment processes, determination of external and internal heat and moisture gains. Determination of volume flows and ventilation air parameters. Dimensioning and selection of ventilation system components. Operation of ventilation and air conditioning design programs in the Ventpack environment.</p> <p>PROJECT: Design of a mechanical supply and exhaust ventilation system for a set of rooms in a building. Ventilation air balance. Application of the principles of ventilation air distribution and selection of diffusers and extractors. Duct dimensioning. Selection of fittings and equipment. Calculation of pressure drops and control of air volume flows. Design documentation guidelines.</p>														
Prerequisites and co-requisites	Knowledge of the basics of ventilation and air conditioning. Ability to draw in AutoCAD. Knowledge of the subject Ventilation and Air Conditioning in a first degree engineering course. Basic knowledge of hydraulics and fluid mechanics and thermodynamics.														
Assessment methods and criteria	<table border="1" data-bbox="448 710 1487 846"> <thead> <tr> <th data-bbox="448 710 794 741">Subject passing criteria</th> <th data-bbox="794 710 1141 741">Passing threshold</th> <th data-bbox="1141 710 1487 741">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 741 794 772">Lecture</td> <td data-bbox="794 741 1141 772">60.0%</td> <td data-bbox="1141 741 1487 772">30.0%</td> </tr> <tr> <td data-bbox="448 772 794 806">Task-based exercises</td> <td data-bbox="794 772 1141 806">60.0%</td> <td data-bbox="1141 772 1487 806">30.0%</td> </tr> <tr> <td data-bbox="448 806 794 846">Project</td> <td data-bbox="794 806 1141 846">60.0%</td> <td data-bbox="1141 806 1487 846">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Lecture	60.0%	30.0%	Task-based exercises	60.0%	30.0%	Project	60.0%	40.0%
