

Subject card

| Subject name and code | Eco-design of cities and regions, PG_00053468 | | | | | | | |
|---|---|--|---|-------------------------------------|-----------------------|---|----------------|--------------|
| Field of study | Spatial Development | | | | | | | |
| Date of commencement of studies | February 2024 | | Academic year of realisation of subject | | | 2024/2025 | | |
| Education level | second-cycle studies | | Subject group | | | Optional subject group Subject group related to scientific research in the field of study | | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the university | | |
| Year of study | 1 | | Language of instruction | | | Polish | | |
| Semester of study | 2 | | ECTS credits | | 5.0 | | | |
| Learning profile | general academic pro | cademic profile Assessment 1 | | nt form | asses | | assessment | |
| Conducting unit | Department of Urban Design and Regional Planning -> Faculty of Architecture | | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor dr Miłosz Marciniak Teachers | | | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Projec | Project Seminar | | SUM |
| | Number of study hours | 0.0 | 15.0 | 0.0 | 45.0 | | | 60 |
| | E-learning hours included: 0.0 | | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | | SUM |
| | Number of study hours | 60 | | 10.0 | | 55.0 | | 125 |
| Subject objectives | The aim of the cours solutions used in the methods include the their resilience through | ecological des assessment of | ign of the coas the climatic se | tal zone used i | n the req analyzed | gional a | ind city persp | ective.These |

| Learning outcomes | Course outcome | Subject outcome | Method of verification | | | |
|---------------------------------|--|---|---|--|--|--|
| | K7_W01 | Student knows the essence and complexity of the processes related to the ecological design of cities and regions of the coastal zone, with particular emphasis on the effects of climate change | [SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects | | | |
| | K7_W06 | Student knows and understands the concepts and principles of copyright protection and the need to manage intellectual property resources - in particular in the field of photographic resources, expert studies, databases and spatial information systems. | [SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects | | | |
| | K7_U08 | Student is able to agree with the group the correct division of tasks, support each other substantively and inspire in finding the best proecological solutions at various scales. By conducting a seminar, he can involve the group in a discussion. | [SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task | | | |
| | [K7_K81] is able to cooperate in international team at her/his own university, during work placement and during study abroad | Student potrafi pozyskać aktualną wiedzę o podejściu proekologicznym w projektowaniu miast i regionów strefy nadmorskiej. | [SK3] Assessment of ability to organize work [SK4] Assessment of communication skills, including language correctness [SK1] Assessment of group work skills | | | |
| | K7_U05 | Student is able to interpret the system of connections on a regional and local scale - primarily natural and functional relations. | [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task | | | |
| Subject contents | | | | | | |
| | Identification and assessment of the ecological problems of the region affecting the cities and other settlement structures of the coastal zone. Identification and assessment of ecological problems of cities and other settlement structures of the coastal zone. General principles of sustainable design of cities and other settlement structures in the coastal zone. Links between pro-ecological activities on a regional scale with the coastal zone. Identification of pro-ecological activities on a regional scale, affecting cities and settlements in the coastal zone. Ecological space and strategies of urban development. Ecological design as an instrument of environmental protection. Assessment of sensitivity and adaptation potentials of various types of spatial structures of the coastal zone. | | | | | |
| Prerequisites and co-requisites | | | | | | |
| Assessment methods | Subject passing criteria | Passing threshold | Percentage of the final grade | | | |
| and criteria | Presentation of the thematic presentation | 100.0% | 100.0% | | | |
