

Subject card

Subject name and code	Large-scale urban project's development, PG_00053622						
Field of study	Spatial Development						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	2	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Gabriela Rembarz					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		10.0		55.0	125
Subject objectives	The aim of the course is to introduce understanding of using a masterplan format as a planning and coordination tool for the implementation of large-scale urban assumptions.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K7_W04	1. the student recognizes and constructively interprets the conditions resulting from the technical infrastructure characteristics, 2. the student has the ability to formulate spatial assumptions concept for the development of technical infrastructure, 3. the student has the ability to pre-evaluate the development in terms of its adaptation possibilities for new city programs, 4. the student understands and applies the principles of building spatial and social continuity in the implementation of large-scale projects in post-industrial / post-industrial areas,	[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge
	K7_W01	1. student has knowledge of the key large-scale development projects implemented in port cities in the last four decades, 2. student knows and applies in planning the principles of masterplanning, 3. student knows and applies in the own proposed design solutions the main principles of the revitalization process, 4. students understands the limitations and potentials of the waterfronts' areas for the implementation of the modern large-scale urban structures,	[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge
	K7_U06	1. student can develop the structure of a project task defined as a descriptive task, 2. student is able to set variant directions for the development of a project task, 3. student uses the scenario method to develop working models for the structure of a project task, 4. student is able to use examples of good practice in formulating the structure of a project task and potential variants of working concepts,	[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools
Subject contents	<ol style="list-style-type: none"> 1. masterplan as a planning tool, 2. methods of using examples of the best practice, 3. leading masterplan examples for planning large-scale waterfront urban developments, 4. structure of design studio organisation in the process of planning draft masterplan concept, 5. options, variants, scenarios - tools of the process in planning a draft masterplan concept, 6. methods of presenting and evaluating the results of intermediate stages in planning a draft masterplan concept, 		
Prerequisites and co-requisites	PG_00053608, PG_M0001485, PG_0005360, PG_M000149, PG_00053620, PG_00053619, PG_M000148, PG_00053606 PG_0005360		

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Assessment of analytical tasks	70.0%	20.0%
	Assessment of activity during the design studio and results of the own studies&research	90.0%	20.0%
	Assessment of design tasks	80.0%	60.0%
