

Subject card

Subject name and code	CHEMISTRY OF SYNTHETIC DRUGS, PG_00038903							
Field of study	Chemistry							
Date of commencement of studies	February 2024		Academic year of realisation of subject		2024/2025			
Education level	second-cycle studies		Subject group		Optional subject group			
Mode of study	Full-time studies		Mode of delivery		at the university			
Year of study	1		Language of instruction		Polish			
Semester of study	2		ECTS credits		6.0			
Learning profile	general academic profile		Assessment form		exam			
Conducting unit	Department of Organic Chemistry -> Faculty of Chemistry							
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Krystyna Dzierzbicka					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM	
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60	
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM	
	Number of study hours	60	10.0	80.0	150			
Subject objectives	<p>Overview of synthesis of selected drugs from different pharmacological groups.</p> <p>Implementation of selected pharmaceutical preparations in accordance with <i>List of Preparations</i> containing a synthesis of single-stage, two-stage and multi-stage covering a variety of chemical processes for example: alkylation, acylation, nitration, sulfonation, esterification, oxidation, reduction.</p>							
Learning outcomes	Course outcome		Subject outcome		Method of verification			
	K7_U01		The student can use the appropriate literature sources on the synthesis of drugs.		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information			
	K7_W02		Student draws a correct structural formulas of drugs. Student identifies separate class of drugs. Student classifies organic reaction mechanisms in the synthesis of drugs.		[SW1] Assessment of factual knowledge			
	K7_U04		Student planning stages of several organic synthesis drugs.		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools			
	K7_K01		The student has broadened knowledge in the field of drug chemistry, organic chemistry and synthesis of multi-stage organic compounds.		[SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work			

Subject contents	<p>1. Acetylsalicylic acid and sulfonamides - historical, synthesis and application</p> <p>2. History of talidomide.</p> <p>3. Discussion syntheses of selected drugs the following pharmacological groups:</p> <p>3.1. analgesics and antipyretics drugs</p> <p>3.2. antiviral drugs</p> <p>3.3. anticancer drugs</p> <p>3.4. cardiac drugs</p> <p>3.5. antidiabetic drugs</p> <p>3.6. hypertension drugs</p> <p>3.7. hypnotics and sedatives drugs</p> <p>3.8. psychotropic drugs</p> <p>3.9. immunosuppressive drugs</p>									
Prerequisites and co-requisites	Student should possess background of organic chemistry and basic English to read reviews and original articles.									
Assessment methods and criteria	<table border="1" data-bbox="446 1107 1489 1282"> <thead> <tr> <th data-bbox="446 1107 806 1163">Subject passing criteria</th><th data-bbox="806 1107 1144 1163">Passing threshold</th><th data-bbox="1144 1107 1489 1163">Percentage of the final grade</th></tr> </thead> <tbody> <tr> <td data-bbox="446 1163 806 1219">The meeting of 60% of points with three the lecture-colloquias.</td><td data-bbox="806 1163 1144 1219">100.0%</td><td data-bbox="1144 1163 1489 1219">50.0%</td></tr> <tr> <td data-bbox="446 1219 806 1282">Implementation of the planned syntheses of drugs according to the list.</td><td data-bbox="806 1219 1144 1282">100.0%</td><td data-bbox="1144 1219 1489 1282">50.0%</td></tr> </tbody> </table>	Subject passing criteria	Passing threshold	Percentage of the final grade	The meeting of 60% of points with three the lecture-colloquias.	100.0%	50.0%	Implementation of the planned syntheses of drugs according to the list.	100.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade								
The meeting of 60% of points with three the lecture-colloquias.	100.0%	50.0%								
Implementation of the planned syntheses of drugs according to the list.	100.0%	50.0%
