

Subject card

Subject name and code	Optimizing database, PG_00045764						
Field of study	Technical Physics						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Theoretical Physics and Quantum Information -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bartosz Reichel				
	Teachers		dr inż. Bartosz Reichel				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		10.0	75
Subject objectives	Familiarization with advanced relational database structures such as the extension of procedural languages						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W04] Has enhanced knowledge of mathematical, numerical and simulation methods applied in the description and modelling of physical phenomena.		Student describes the structure of Oracle database Student explains an example query plan Student lists the elements of privileges for Oracle databases		[SW1] Assessment of factual knowledge		
	[K7_U02] Has enhanced knowledge of programming languages and can use software packages.		Students analyze the SQL query		[SU1] Assessment of task fulfilment		
	[K7_K01] Knows limitations of own knowledge. Understands the need to learn and improve professional and personal competencies.		Awareness of the moment when need to expand knowledge,		[SK5] Assessment of ability to solve problems that arise in practice		

Subject contents	<p>1.Introduction 2h The history of the development of Oracle databases, Oracle Installation, connection to the database, the configuration of the package. What are relational databases. The basic assumptions of the structural query language SQL (Structured Query Language). Basic concepts: tables, columns, rows.</p> <p>2.Structure of Oracle database 2h Components of the Oracle database: data files, settings files, log files, backup files. 3. Struktura 4h Data types (character, numeric types representing date). BLOB data. Conversion types, combining the comparison. NULL in the Oracle database and other SQL databases (variations, traps). Tables, Indexes, Prospects. 4.Basics of SQL 4h Basic SQL query (SELECT, INSERT, DELETE, UPDATE, CREATE TABLE ...), allowing the testing of the database and obtain configuration information. Breakdown of queries on the DML (Data Manipulation Language), DDL (Data Definition Language), DCL (Data Control Language), TCL (Transactional Control Language). 5.Modeling of database, design of database 6g Tools to help database design from both the Oracle and beyond what. Analyze Query and software (Query Analyzer). The concept of their primary keys, foreign keys and their relationship. Normal forms. The process of normalization of data. How and when to normalize the data. What are data warehouses. 6. Basics of database administration 6h Tools for database management and user accounts and privileges from Oracle and external. Security and limiting access to an Oracle database. Special roles: SDB, SYSDBA, SYSOPER. Space system tables: XFS, TEMP, TOOLS, USERS. Matching the size of tablespaces. System Global Area - what it is and its use. Monitoring of the database and log interpretation. The process of recovering lost data. Fragmentation and the reorganization of the data. 7. Working with Oracle database 2h Access to the Oracle database with the Java platform. NET (C #). Setting up development environments, libraries joining (Oracle C++ Call Interface - OCCI). 8. Migration to Oracle database from other relational databases 4h Migration to the Oracle database and differences in relation to Oracle's most well-known relational databases such as PostgreSQL, MySQL, FireBird, SQLite, DB2, MSSQL</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Written exam	50.0%	50.0%
	Presentation	50.0%	50.0%
Recommended reading	Basic literature	<p>1.M. Theriault, R. Carmichael, J. Viscusi, Oracle DBA – Administrowanie bazą danych, Oracle Press 2001 2.R. Greenwald, R. Stackowiak, J. Stern, Oracle Database 11g – To co najważniejsze, PWN 2009 (z serii O'Reilly) 3.Marie St. Gelais, Oracle9i DBA Fundamentals I English Student Subscription, Oracle 2002 (from Oracle Academy) 4.Ch. Koratamaddi, P. Vennapusa, Oracle Database 10g: Introduction to SQL English Student Subscription, Oracle 2006 5.P. Daux, J. Gallus, J. Speelpenning, Data Modeling and Relational Database Design English Student Subscription, Oracle 2002 6.J. L. Harrington, Relational Database Design Clearly Explained, Academic Press 2002</p>	
	Supplementary literature	No requirements	
	eResources addresses	<p>Adresy na platformie eNauczanie: Optymalizacja Baz Danych 2024 - Moodle ID: 37130 https://enauzanie.pg.edu.pl/moodle/course/view.php?id=37130</p>	
Example issues/ example questions/ tasks being completed	- describe database syntax from DML, DDL, DCL		
Work placement	Not applicable
