

Subject card

Subject name and code	, PG_00058005						
Field of study	Spatial Development						
Date of commencement of studies	October 2022	Academic year of realisation of subject	2023/2024				
Education level	second-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery	at the university				
Year of study	2	Language of instruction	English				
Semester of study	3	ECTS credits	15.0				
Learning profile	general academic profile	Assessment form	exam				
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. arch. Piotr Lorens					
	Teachers	prof. dr hab. inż. arch. Piotr Lorens					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	60	0.0	0.0	60		
Subject objectives	Preparation of the student for the completion of the diploma thesis. The subject of the diploma thesis at the second degree studies is a theoretical or theoretical-application study in the field of urban planning, containing an in-depth study of the assumed research problem, containing elements of synthesis and indicating the possibilities of solving the problem in the context of in-depth socio-economic, legal and technical analyzes, as well as an original proposal for the application of the proposed solutions depicted in a selected space.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K7_W05	He knows and uses the techniques used in research and application work and is able to apply them to solve a specific planning problem	[SW3] Assessment of knowledge contained in written work and projects
	K7_U04	Has the ability to acquire, collect and process data, electronic information and scientific materials in the discipline of architecture and urban planning	[SU4] Assessment of ability to use methods and tools
	K7_W06	Can identify the possibilities of using graphic and text materials in the thesis in relation to their intellectual property.	[SW3] Assessment of knowledge contained in written work and projects
	K7_U05	can recognize the needs in the field of expanding knowledge related to the implementation of a research and application task	[SU3] Assessment of ability to use knowledge gained from the subject
	K7_U06	Has basic knowledge of the methodology of conducting scientific research and publication of research results in the discipline of architecture and town planning and is able to formulate a design specification for a complex planning task	[SU1] Assessment of task fulfilment
	K7_U03	Has in-depth knowledge of the determinants of spatial development and spatial management	[SU4] Assessment of ability to use methods and tools
	K7_K02	Understands the need to cooperate with stakeholders and the local community in the process of participatory planning	[SK1] Assessment of group work skills
	[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems	Knows the specifics of a multi-faceted research and application urban development and understands the need to cooperate with experts	[SU1] Assessment of task fulfilment
K7_U02	In connection with the future profession, he understands complex problems, can identify and resolve dilemmas and assess the risks and effects of his actions.	[SU3] Assessment of ability to use knowledge gained from the subject	
Subject contents	The diploma thesis should contain: - theoretical part, including a description of the state of knowledge about a selected research problem, an in-depth analysis of this issue in a multifaceted approach, made with the use of spatial planning tools and techniques appropriate to the problem, as well as conclusions that can be applied in various contexts of urban planning or design - application part, covering the implementation of the conclusions of the theoretical part in a specific space or in a selected spatial development context (e.g. in the form of a design, planning, strategic, methodological study, etc.).		
Prerequisites and co-requisites	pass the module Diploma Design I		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	complex text-graphic raport of a research and application character	100.0%	100.0%
Recommended reading	Basic literature	Selected individually by the work supervisor depending on the subject of the diploma thesis.	
	Supplementary literature	Selected individually by the work supervisor depending on the subject of the diploma thesis.	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	<p>- theoretical text and graphic part, covering research issues in the field of spatial planning and town planning, defined and assessed individually by the thesis supervisor</p> <p>- application part, covering the implementation of the conclusions of the theoretical part in a specific space or in a selected context of spatial management to the extent specified and assessed individually by the work supervisor</p>		
Work placement	Not applicable
