GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	The virtual measurement instruments, PG_00044110		
Field of study	Electrical Engineering		
Date of commencement of studies	October 2022	Academic year of realisation of subject	2024/2025
Education level	first-cycle studies	Subject group	
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	English
Semester of study	5	ECTS credits	2.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Department of Metrology and Information Systems -> Faculty of Electrical and Control Engineering		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Beata Pałczyńska	
	Teachers		

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	0.0	15.0	0.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	5.0	15.0	50

Subject objectives

Introduce students with the methods and tools for programming of virtual measurement systems.

Learning outcomes

Course outcome	Subject outcome	Method of verification
K_K05		
K6_K05	The student knows the rules of conduct in the event of a failure of the measuring stand-up.	[SK5] Assessment of ability to solve problems that arise in practice
K6_K01	The student knows the software supporting the measurement systems software.	[SK3] Assessment of ability to organize work
K6_W10		
K6_U09		
K6_U10		

Subject contents

The virtual instrument (VI) as a generous trend in measurement instrumentation. The conception of the virtual measuring instruments. The structure and the organization of computer-based measuring systems. The basis functional blocks. The measurement system configuration. The programming panels. The graphical user interface.

The hardware of VIs. The multi-function data acquisition board DAQ - construction and applications. DAQ signals, The signal conditioning. The interface standards in measuring system. The system interface bus. The serial interface. Measuring systems based on IEC-625 interface.

The software environment for development of measurement systems. Introduction to LabVIEW development environment, graphical programming language G, Virtual Instrument as basic module of creating application in G language.

Integration of VIs to computer network. VIs working under RTOS.

Design and implementation of VIs, practical aspects.

Advantages and disadvantages of VIs - analysis of development.
