

Subject card

Subject name and code	Quality of Electric Energy (PQ I), PG_00036792						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Power Electronics and Electrical Machines -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jarosław Łuszcz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		35.0	100
Subject objectives	Presentation of the issues related to the quality of electricity in an industrial environment.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_U09	The student is able to select power equipment for various load modes.			[SU1] Assessment of task fulfilment		
	K6_W10	The student knows the principles of processing, use and rational use of electrical energy			[SW1] Assessment of factual knowledge		
	K6_K01	Knowledge of sources of specialist knowledge extending the scope of the course content.			[SK5] Assessment of ability to solve problems that arise in practice		
	K6_K05	He can organize work in accordance with the principles of safety rules.			[SK3] Assessment of ability to organize work		
Subject contents	Power quality indices. Standardization requirements. Reasons for the degradation of energy quality. Sources of harmonic distortions. The effects of poor energy quality.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Task realisation		60.0%		100.0%
