

Subject card

Subject name and code	Design of automatic control systems with electric motors, PG_00059856								
Field of study	Automation, Robotics and Control Systems								
Date of commencement of studies	October 2021		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group						
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	3		Language of instruction			Polish			
Semester of study	6		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Controlled Electric Drives -> Faculty of Electrical and Control Engineering								
Name and surname	Subject supervisor	prof. dr hab. ir	rof. dr hab. inż. Marcin Morawiec						
of lecturer (lecturers)	Teachers								
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
of instruction	Number of study hours	15.0	0.0	0.0	0.0 30.0		0.0	45	
	E-learning hours inclu	uded: 0.0				i			
Learning activity and number of study hours	Learning activity	Participation i classes include plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	45		10.0		45.0		100	
Subject objectives	The aim of the course is to familiarize with automatic control systems used in electric micromachines such as DC motors, servo drives, hybrid motors.								
Learning outcomes	Course out	come	Subject outcome			Method of verification			
	[K6_U04] has the ability to self- educate, among other things, in order to improve professional qualifications		has the ability to self-educate, among others in order to improve professional qualifications			[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools			
	[K6_K05] can think and act in an entrepreneurial way		Student can think and act in an entrepreneurial way			[SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills			
	[K6_W06] knows the structure of computers and microprocessors and the tasks of operating systems, has basic knowledge of the basics of computer software, drivers, microprocessor technology, design of simple algorithms and the operation of information networks		knows the structure of computers and microprocessors and the tasks of operating systems, has basic knowledge of the basics of computer software, controllers, microprocessor technology			[SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge			
	[K6_W07] has basic knowledge related to control and automation systems		has basic knowledge related to control and automation systems			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation			
	[K6_W11] knows the hazards arising from devices, installations, systems and technical systems, basic principles of occupational health and safety, taking into account the role of control and security systems in controlling automation and robotics facilities		knows the threats posed by devices, installations, systems and technical systems, as well as the basic principles of occupational health and safety			[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge			

Data wydruku: 02.05.2024 08:18 Strona 1 z 2

1. Introduction to electric drive 2. Overview of converter systems used in micro and servo drives 3. Converter drive automation including microdrives 4. Design of a system with a microdrive controlled by a microcontroller (electronics design) 5. Implementation of the control system in a system with a microcontroller 6. Functional tests in the laboratory Prerequisites and co-requisites Assessment methods and criteria Subject passing criteria Passing threshold Percentage of the final grade Lecture 50.0% Project 75.0% 85.0% Recommended reading Basic literature Debowski A., Automatyka napędu Elektrycznego, Wydawnictwo Naukowe PWN, 2017. Gibilisco S., Schematy elektroniczne i elektryczne. Przewodnik dla początkujących, Wydawnictwo Hellon, 2021. https://forbot.pl/blog/kurs-arduino-silniki-pwm-serwomechanizm-zewnetzne-biblioteki-id3913 www.st.com Supplementary literature	Subject contents
