

Subject card

Subject name and code	Electromagnetic Compatibility of Electrical Equipment (EMC), PG_00041825						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group				
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Power Electronics and Electrical Machines -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jarosław Łuszcz				
	Teachers		dr hab. inż. Jarosław Łuszcz				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	10.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		40.0	75
Subject objectives	Identification of electromagnetic interference issues in electrical devices.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_K05		Is able to evaluate EMC hazards occurring in electrical installations..		[SK5] Assessment of ability to solve problems that arise in practice		
	K6_W11		Student knows the principles of designing electrical installations		[SW1] Assessment of factual knowledge		
	K6_W10		The student knows the principles of processing, use and rational use of electrical energy		[SW1] Assessment of factual knowledge		
	K6_W09		The student knows the basics of electricity generation, transmission and distribution		[SW1] Assessment of factual knowledge		
	K6_U10		The student is able to design simple low-voltage electrical installations		[SU1] Assessment of task fulfilment		
	K6_K01		The student is aware of the need for continuous education		[SK5] Assessment of ability to solve problems that arise in practice		
	K6_U05		The student has the necessary preparation to work in an industrial environment		[SU1] Assessment of task fulfilment		
	K6_U09		The student is able to select power equipment for various load modes.		[SU1] Assessment of task fulfilment		
Subject contents	Sources and propagation of conducted and radiated disturbances. Electromagnetic emission and immunity of electrical devices. EMC in power electronics. EMC and LVD Directives, harmonized standards, certification tests of electrical devices. Electromagnetic interference limitation (grounding, shielding, filtration, separation, balancing). Basic anti-interference elements (capacitors, inductors, RFI filters, shields). Principles of designing electromagnetically compatible devices and installations. Sample analysis of typical problems related to EMC in electrical devices. Problems related to EMC in converter based drive systems. The influence of electrical equipment on the environment, living organisms and humans.						
Prerequisites and co-requisites	Any						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Dissertation	50.0%	50.0%
	Midterm colloquium	50.0%	50.0%
