

Subject card

Subject name and code	Programming of microcontrollers with ARM core, PG_00054497						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group				
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Controlled Electric Drives -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Marcin Morawiec				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	10.0	0.0	20.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	The aim of the course is to present microcontrollers with an ARM core. Discussion of the ARM architecture and the possibilities of its application in automation and electrical engineering as well as in everyday life. Deepening the programming skills in the C language by developing control functions. Programming the peripheral devices of the interface with the STM32F407 processor by the student allows to develop the skills of programming modern electronic devices.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_W10		knows the basics of processing, use and rational use of electricity, including the principles of electric traction		[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
	K6_W11		knows the principles of designing electrical installations and electric lighting, controlling electrical devices		[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
	K6_U10		The student knows the principles of designing simple electrical networks and installations		[SU3] Assessment of ability to use knowledge gained from the subject		
	K6_U05		The student is able to follow the rules of occupational health and safety		[SU3] Assessment of ability to use knowledge gained from the subject		
	K6_W09		The student will know the basics of electricity conversion		[SW3] Assessment of knowledge contained in written work and projects		
	K6_U09		The student is able to select devices and apparatus for long-term load		[SU5] Assessment of ability to present the results of task		
	K6_K05		The student is able to react appropriately in life-threatening conditions		[SK5] Assessment of ability to solve problems that arise in practice		
	K6_K01		The student has self-education awareness related to software development		[SK4] Assessment of communication skills, including language correctness		

Subject contents	<div>1. ARM architecture</div> <div>2. ARM architecture.</div> <div>3.I / O ports</div> <div>4. C programming and bit operations</div> <div>5. Microcontroller interfaces (serial, parallel)</div> <div>6.A / C and C / A converter</div> <div>7.A / C and C / A converter cont.</div> <div>8.Interrupts, Timers, Clocks etc.</div> <div>9. Overview of sample programs</div> <div>10. Overview of sample programs cd.</div> <div>11. Cooperation of microcontroller with FPGA</div> <div>12.Wired and wireless interfaces (I2C, I2S, CAN)</div> <div>13.Wired and wireless interfaces (I2C, I2S, CAN) cont.</div> <div>14.Exemplary applications (voltage converter)</div> <div>15.Exemplary applications (voltage converter)</div>		
Prerequisites and co-requisites	Programming skills in C / C ++ at the basic level.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory	60.0%	70.0%
	Lecture	60.0%	30.0%
