

Subject card

Subject name and code	MSc Diploma Seminar, PG_00062653						
Field of study	Naval Architecture and Offshore Structures						
Date of commencement of studies	February 2024		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Institute of Naval Architecture -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Zbigniew Korczewski				
	Teachers		prof. dr hab. inż. Zbigniew Korczewski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		6.0		14.0	50
Subject objectives	Teach students the principles of the diploma thesis						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U04] Prepares professional presentations of analysis outcomes persuasively, providing them with profound interpretations to clearly convey their significance		The student correctly interprets information in foreign-language scientific literature and prepares presentations of his/her works		[SU1] Assessment of task fulfilment		
	[K7_K03] To aptly prioritize to achieve self-defined goals or other tasks, effectively identify and resolve professional dilemmas associated with their occupation		The student is able to notice knowledge gaps in a specific field and is able to supplement them through consultations with specialists		[SK5] Assessment of ability to solve problems that arise in practice		
	[K7_U06] Actively enhances skills and potential by taking initiative and responsibility in achieving personal goals while supporting the personal development of colleagues		The student has the ability to perform a complex design task.		[SU3] Assessment of ability to use knowledge gained from the subject		
Subject contents	Organization of classes. Discussing the rules for completing the master thesis as part of a group project. Course contents, features and functions of the master's thesis, motivation to take up the topic within a group project. Genesis, selection, formulation and justification of the topic. Division of tasks between members of the project group and establishing communication rules. Methods of scientific research in the design and operation of marine and ocean-engineering machines and devices. The layout of the work, the technique of editing the content, the ways of presenting the results of the research, preparation of the documentation of the completed part of the project, source literature. Presentation of the results of partial tasks of a group project and their settlement. Degree of goal completion. Cognitive and utilitarian conclusions. The course of the diploma exam.						
Prerequisites and co-requisites	Registration for the diploma semester						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	presntation		100.0%		50.0%		
	Attendance		75.0%		50.0%
