

Subject card

Subject name and code	Marine energy technologies, PG_00062661						
Field of study	Naval Architecture and Offshore Structures						
Date of commencement of studies	February 2024		Academic year of realisation of subject			2023/2024	
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Part-time studies		Mode of delivery			at the university	
Year of study	1		Language of instruction			Polish	
Semester of study	1		ECTS credits			2.0	
Learning profile	general academic profile		Assessment form			assessment	
Conducting unit	Zakład Siłowni Okrętowych -> Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Zbigniew Korczewski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	18.0	0.0	0.0	0.0	0.0	18
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	18	2.0	30.0	50		
Subject objectives	Teach the basics of marine energy in terms of the possibility of using renewable energy sources, with particular emphasis on the applied energy system solutions.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W01] Identifies with a profound understanding the phenomena related to ocean engineering, describing advanced theories and methods for analyzing processes in technical oceanographic systems	Has basic knowledge of energy transformation and transmission processes carried out in complex ocean engineering systems.			[SW1] Assessment of factual knowledge		
	[K7_K02] Is aware of their social role as a graduate of a technical institution, understanding the importance of adhering to professional ethics and respecting diverse perspectives	Is aware of the need to develop new marine technologies in the field of renewable energy sources.			[SK4] Assessment of communication skills, including language correctness		
	[K7_W05] Considers in advanced analyses the technical, environmental, economic, legal, and ethical aspects related to maritime activities, demonstrating an awareness of responsibility for decisions made and fostering the development of individual entrepreneurship	Has basic knowledge in the range of technical possibilities within the application of renewable energy sources in marine energy systems.			[SW1] Assessment of factual knowledge		

Subject contents	<p>1. Basic sources and types of energy - renewable and non-renewable energy resources</p> <p>2. The concept of energy consumption and energy expenditure.</p> <p>3. Wind energy - offshore wind farms, sail propulsion</p> <p>4. Energy of sea and ocean waters - hydroelectric power plants</p> <p>5. Solar energy - solar collectors and photovoltaic cells</p> <p>6. Energy storage 7. Hydrogen as an energy carrier</p> <p>8. Electrolysers and fuel cells</p> <p>9. Selected solutions of energy systems in the field of renewable energy</p>											
Prerequisites and co-requisites	Knowledge in thermodynamics, fluid mechanics and machine construction.											
Assessment methods and criteria	<table border="1" data-bbox="451 786 1487 853"> <thead> <tr> <th data-bbox="451 786 794 819">Subject passing criteria</th> <th data-bbox="794 786 1137 819">Passing threshold</th> <th data-bbox="1137 786 1487 819">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 819 794 853">two colloquia</td> <td data-bbox="794 819 1137 853">51.0%</td> <td data-bbox="1137 819 1487 853">100.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	two colloquia	51.0%	100.0%			
Subject passing criteria	Passing threshold	Percentage of the final grade										
two colloquia	51.0%	100.0%
