

Subject card

Subject name and code	MSc Diploma Thesis II, PG_00048803							
Field of study	Electronics and Telecommunications							
Date of commencement of studies	February 2024		Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction			Polish		
Semester of study	3		ECTS credits			14.0		
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Department of Decision Systems and Robotics -> Faculty of Electronics, Telecommunications and Informatics							
Name and surname of lecturer (lecturers)	Subject supervisor Teachers	dr inż. Paweł Raczyński						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Project	ct Seminar		SUM
of instruction	Number of study hours	0.0	0.0	0.0	0.0		0.0	0
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	ng activity Participation in classes include plan				Self-study		SUM
	Number of study hours	0		30.0		320.0		350
Subject objectives	Finalisation of the master thesis.							

Data wydruku: 19.05.2024 11:53 Strona 1 z 2

Intellectual property protection. He extent, the economic, legal and other conditions of various types of activities related to the grant of activities or the economic and and other conditions of various types of activities related to the grant of activities on the economics and nother conditions of various types of activities of protection of indivistrial property and copyright.	Learning outcomes	Course outcome	Subject outcome	Method of verification				
obligations, inspire and organisa activities for the social environment, initiate actions for the public interest, think and act in the social interest, the social regarding and initiate activities for the public interest, think and act in the exchange of the public interest, think and act in the exchange of the public interest, think and act in the exchange of the public interest, think and act in the exchange of the public interest and development of entregerence of the public interest and development of entregerence of the public interest and other conditions of various types of activities related to the given qualification, including the principles of protection or industrial property and copyright. [R7_U10] can individually plan and pursuit their own iffelong education and influence others in advanced information and communication technologies (ICT), and communication technologies (ICT), and communication technologies (ICT), and communication on specialist issues with diverse recipients, appropriately justify points of view, as well as use specialist eminology related to the field of study in communication and solving these tasks, cammanda and experimental expenditual and information and communication of suggested solutions and experimental expenditual and information and experimental expenditual ex		critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical	received content. Understands the role of science in solving cognitive	solve problems that arise in				
Indefestands, to an increased extent, the economic, legal and other conditions of various types of activities related to the grade principles of protection of administration of activities or protection. The principles of protection of industrial properly and copyright. IK7_U10 can individually plan and pursuit their own lifelong education and influence others in this aspect, also by means of advanced information and pursuit their own lifelong education and influence others in this aspect, also by means of advanced information and separation of the problems, appropriately justify points of view, hold debates, present, assess and discuss different opinions and points of view, as well as use specialist terminology related to the field of study in communication IK7_U08 while identifying and formulating engineering tasks specifications and solving these tasks, cann-apply analytical, simulation and experimental methods in another problems, analyze them and experimental methods and tools (IXI) and experimental methods and tools (IXI) and experimental methods in another problems, analyze them and experimental methods and tools (IXI) and experimental methods in another problems, and experimental methods and tools (IXI) and experimental methods and tools (IXI) and experimental methods in the problems and experimental methods to solve the problems and experimental methods		obligations, inspire and organise activities for the social environment, initiate actions for the public interest, think and act in	perform professional functions in the social interest. Is able to organize and initiate activities for the public interest and	solve problems that arise in				
pursuit their own lifelong education and influence others in this aspect, also by means of advanced information and communication technologies (ICT), and communication technologies (ICT), and communication specialist issues with diverse recipients, appropriately justify points of view, hold debates, present, assess and discuss different opinions and points of view, as well as use specialist terminology related to the field of study in communication [K7, U08] while identifying and formulating engineering tasks specifications and solving these tasks, cann-apply analytical, simulation and experimental methods, an notice their systemic and non-technical aspects, make a preliminary economic assessment of suggested solutions and engineering workn Subject contents Student proposes a solution to the formulated problem, selects the necessary tools and codes, configures their environment, plans and carries out experiments to evaluate the proposed solution, as well as prepare the final version of the master thesis. Prerequisites		understands, to an increased extent, the economic, legal and other conditions of various types of activities related to the given qualification, including the principles of protection of	intellectual property protection. He understands the impact of his activities on the economics and environment in which he conducts	[SW1] Assessment of factual				
Tormulating engineering tasks specifications and solving these tasks, cann- apply analytical, simulation and experimental methods, notice their systemic and non-technical aspects, notice their systemic and non-technical aspects, nake a preliminary economic assessment of suggested solutions and engineering workn Subject contents Student proposes a solution to the formulated problem, selects the necessary tools and codes, configures their environment, plans and carries out experiments to evaluate the proposed solution, as well as prepare the final version of the master thesis. Prerequisites and co-requisites Subject passing criteria Passing threshold Percentage of the final grade and criteria Subject passing criteria Passing threshold Percentage of the final grade Acceptance of the final manuscript. 100.0% 100.0% 100.0% Recommended reading Supplementary literature Percentage of the thesis. Supplementary literature Percentage of the thesis. Percentage of the thesis		pursuit their own lifelong education and influence others in this aspect, also by means of advanced information and communication technologies (ICT), and communicate on specialist issues with diverse recipients, appropriately justify points of view, hold debates, present, assess and discuss different opinions and points of view, as well as use specialist terminology related to the field of	for developed by themselves solution for a technical problem,
