

Subject card

Subject name and code	Databases and data warehouses, PG_00062741						
Field of study	Technologies for Industry 5.0						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Physics and Applied Computer Science -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Bartosz Reichel					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	2.0		18.0	50	
Subject objectives	Acquiring knowledge and skills related to relational and non-relational databases, as well as data warehouses.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W06] demonstrates knowledge related to data analysis and engineering, machine learning, knows the principles of integrating data with management systems to analyze complex engineering and technological problems	The student demonstrates knowledge of relational and non-relational databases and data warehouses in order to analyze complex engineering and technological problems.			[SW1] Assessment of factual knowledge		
	[K6_U06] performs analysis, exploration and cleaning of data sets, can use statistical models and machine learning models, integrate various analytical, management and data storage tools	The student analyzes, explores, and transforms data sets using relational and non-relational databases, and is able to integrate various data analysis, management, and storage tools using data warehouses.			[SU1] Assessment of task fulfilment		

Subject contents	<p>Introduction to Databases (2 hours)</p> <p>Examples of popular database systems.Relational Databases and SQL (6 hours)</p> <p>Relational Database Extensions (3 hours)</p> <p>NoSQL Databases as Exemplar of MongoDB (4 hours)</p> <p>Aggregations and Queries in MongoDB.Data Warehouses (4 hours)</p> <p>ETL (Extract, Transform, Load) process (4 hours)</p> <p>Dimensions in a data warehouse (3 hours)</p> <p>Data analysis (4 hours)</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="459 792 794 815">Subject passing criteria</th> <th data-bbox="802 792 1137 815">Passing threshold</th> <th data-bbox="1145 792 1481 815">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="459 826 794 848">laboratory test</td> <td data-bbox="802 826 1137 848">60.0%</td> <td data-bbox="1145 826 1481 848">50.0%</td> </tr> <tr> <td data-bbox="459 860 794 882">exam</td> <td data-bbox="802 860 1137 882">60.0%</td> <td data-bbox="1145 860 1481 882">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	laboratory test	60.0%	50.0%	exam	60.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
laboratory test	60.0%	50.0%										
exam	60.0%	50.0%
