

## § GDAŃSK UNIVERSITY § OF TECHNOLOGY

## Subject card

Subject name and code	MANAGEMENT SIMULATION GAME, PG_00054585							
Field of study	Engineering Management							
Date of commencement of studies			Academic year of realisation of subject		2023/2024			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			e-learning		
Year of study	3		Language of instruction			English		
Semester of study	6		ECTS credits			4.0		
Learning profile	general academic profile		Assessment form		asses	assessment		
Conducting unit	Faculty of Management and Economics							
Name and surname	Subject supervisor		dr inż. Grzegorz Zieliński					
of lecturer (lecturers)	Teachers		dr inż. Grzegorz Zieliński					
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM
of instruction	Number of study hours	15.0	30.0	0.0	0.0		0.0	45
	E-learning hours included: 45.0							
Learning activity and number of study hours	Learning activity	Participation in classes includ plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	45		6.0		49.0		100
Subject objectives	The aim of the course is to acquire knowledge of design, modeling and optimization of technical processes and systems in the area of production planning and control. The subject uses simulation methods, which are a tool for measuring and improving technical solutions for processes carried out in the organization							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_U10] uses tools to measure and improve technical solutions concerning: devices, objects, systems, processes, products and services		Student uses tools to measure and improve technical solutions relating to: production systems, processes, products and services			[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_K82] is equipped to participate in lectures, seminars and laboratory classes conducted in foreign language		K6_K82 Student is prepared to participate in classes in a foreign language, including practical classes			[SK3] Assessment of ability to organize work		
	in foreign language in terms of		Student has knowledge of grammatical structures and lexical areas in the area of business management, including process and production management		[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects			
	[K6_W13] has a basic knowledge of the design, modelling and optimisation of technical processes and systems		Student has basic knowledge of design, modeling and optimization of technical processes and systems in the area of production planning and control			[SW3] Assessment of knowledge contained in written work and projects		

Subject contents	Organizing the business
	Assigning functions to individual team members.
	Defining the organization of work, goals to be achieved by individual team members and team rules.
	Market research commission.
	Foundation of the company
	Construction of a production plant.
	Assessment of market opportunities.
	Formulate an overall business strategy.
	Designing at least one brand for each of the target segments.
	Scheduling the opening of one or two sales offices and / or an on-line center.
	Entering the test market
	Establishing a production schedule with changeover of the production line
	Determining pay packages.
	Employment of commercial staff.
	Allocation of new brands to sales employees.
	Fixing product prices.
	Designing an advertising campaign.
	Purchase of market research.
	Improving activities
	Improving production processes
	Investments in product quality, quality control and preventive actions.
	Analysis of market and operational data obtained on the test market.

	If necessary - correction of the company's strategy and tactics.				
	Development investments				
	Improving the efficiency of the production plant by managing production capacity, expanding the production plant and implementing a quality control program. Consolidation of the company's strategy. Preparation of a business plan, searching for investment capital for the company. Investing in R&D to bring new product components to market. Raising the level of employee satisfaction (and production efficiency)				
	Significantly increasing the network of sales offices and the visibility of the website.				
	Extending the market offer				
	Introducing new products containing R&D components.				
	Further expansion into the market by increasing the number of sellers and sales channels and increasing production.				
	Improving business strategy				
	Analyze market, production and financial data to determine how to better meet customer needs, increat employee satisfaction, and deliver higher quality and lower price products.				
	Improving the allocation of limited resources to outdo the competition.				
Prerequisites and co-requisites					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade		
and criteria	result of the game	60.0%	70.0%		
	presentation	60.0%	30.0%
