

Subject card

Subject name and code	Introduction to Local Governance and Theory of Spatial Planning, PG_00053395							
Field of study	Architecture							
Date of commencement of studies	October 2024		Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific		
						research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	1		Language of instruction			Polish		
Semester of study	2		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form			exam		
Conducting unit	Department of Urban	Design and Re	egional Plannin	g -> Faculty of	Archite	cture		
Name and surname	Subject supervisor	prof. dr hab. inż. arch. Piotr Lorens						
of lecturer (lecturers)	Teachers	mgr Michał H	ał Habier					
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
of instruction	Number of study hours	30.0	0.0	0.0	0.0		0.0	30
	E-learning hours inclu	uded: 0.0						
Learning activity and number of study hours	Learning activity	ctivity Participation in classes include plan				Self-study SUM		SUM
	Number of study hours	30		2.0		18.0		50
Subject objectives	The aim of the course is to acquire knowledge of the basics of territorial self-government, legal aspects of the construction investment process and the basics of spatial development and planning theory.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K7_W05] knows and understands issues related to architecture and urban planning in the context of the multi-discipline nature of architectural and urban design as well as the need to cooperate with other specialists; legal provisions and procedures necessary for the implementation of building designs and the integration of buildings with the overall planning project		The student has knowledge of the organization and functioning of space management at the planning stage and at all stages of the investment and construction process.			[SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge		
[K7_W03] knows and understands the history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; advanced issues related to architecture and urban planning useful for designing architectural objects and urban complexes in the social, cultural, natural, historical, economic, legal context and other non-technical conditions of engineering activities, integrating knowledge acquired during studies		tools and insti understood ur	as knowledge itutions of broa rban planning ι ion of an archit	dly used	contair	ned in presen Assessment

Subject contents	Territorial self-government the essence, development in Europe and Poland, the role in spatial management. Regional and local self-government units in Poland, their authorities. Finance of the territorial self-government. Contemporary problems of territorial self-government in Poland.							
	Social participation in spatial management.							
	Construction investment implementation process.							
	Planning and plans their role in management, steering and politics. Types of plans and planning. Subjects and factors shaping space. Instruments of spatial policy. Aspects of space.							
	Regions concept and types. The structure of the region's space. Regional development.							
	Basic theories of spatial economy , contemporary processes (concentration, polarization, urbanization, metropolization).							
	Information about space - sources, processing							
	Spatial planning methods: general procedure, diagnosis (including space valorization, including threshold analysis; forecasting, including scenario method; solution design, including the use of models, scenarios, variants)							
	Strategic planning - concept, features, methods. Integrated planning (strategy + study)							
	Programming of revitalization							
	Supra-communal planning problems - places to solve them; MOF (urban functional areas), ZIT (Integrated Territorial Investments).							
	Selected research problems related to planning and spatial development							
Prerequisites								
and co-requisites Assessment methods	Cubicat passing seiteria	Deseion threehold	Davagetage of the final grade					
and criteria	Subject passing criteria Presence at lectures	Passing threshold 0.0%	Percentage of the final grade 0.0%					
	Colloquium (test)	51.0%	80.0%					
	1

	eResources addresses	Adresy na platformie eNauczanie:			
Example issues/ example questions/ tasks being completed	 What executive and legislative bodies exist at each level of local government units? What is the mode and form of their choices? What are their competences? What are the sources of income of local government units? What is the administrative procedure for obtaining: decisions on development conditions, building permits? What is Christaller's theory about? Give examples: threshold / barriers to city development? In which planning steps can scenarios be used? What authorities do the inhabitants of rural communes elect? 				
Work placement	Not applicable
