

## Subject card

Subject name and code	Modern Technologies in Construction, PG_00057077								
Field of study	Architecture								
Date of commencement of studies	October 2024		Academic year of realisation of subject			2024/2025			
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study			
						Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	1		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Techni	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture							
Name and surname	Subject supervisor	dr inż. arch. Marek Sztafrowski							
of lecturer (lecturers)	Teachers								
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	15.0	15.0	0.0	0.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation ir classes include plan				Self-study		SUM		
	Number of study hours	30		4.0		16.0		50	
Subject objectives	Acquiring the ability to apply innovative technologies in the design of the built environment								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K7_W02] knows and the rules of gathering and their interpretation project concept prepared detailed issues related architecture and urbathe field of complex of problems solving	information on as a part of aration; ed to an planning in	regulations in relation to his project			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects			
[K7_W01] knows and understands construction, building and engineering issues related to building design; principles, solutions, constructions and building materials used in performing complex engineering tasks in the field of architectural and urban design			Student knows innovative building materials and technologies and has knowledge about their application in architectural design process			[SW2] Assessment of knowledge contained in presentation			

Data wydruku: 20.05.2024 00:38 Strona 1 z 2

Subject contents	New technologies in architecture: introduction, concept and role of technology, social aspects of technological innovations, Actor-Network Theory  Building materials - new applications of traditional materials: concrete in architecture, modern insulation systems, foundation slabs, wooden structures  Smartmaterials: nanomaterials, phase change materials, high-performance materials  Building materials development in an environmental aspect: low-processed materials, recycled and susceptible to recycling  Intelligent components and systems in architecture, intelligent environments. Scenarios for the future						
Prerequisites and co-requisites							
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	completion of the tasks	100.0%	100.0%				
Recommended reading	Basic literature	Addington D. M., Schodek D. L.: Smart Materials and New Technologies. For the architecture and design professions, Elsevier, 2005  Aksamija A. Integrating Innovation in Architecture. Design, Methods and Technology for Progressive Practice and Research (2016)  Braham W.W., Hale J. A., (red.)
