GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Modern Technologies in Construction, PG_00057082		
Field of study	Architecture		
Date of commencement of studies	October 2024	Academic year of realisation of subject	2024/2025
Education level	second-cycle studies	Subject group	Obligatory subject group in the field of study Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	English
Semester of study	1	ECTS credits	2.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Joanna Kabrońska	
	Teachers		

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	15.0	0.0	0.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	4.0	16.0	50

Subject objectives

Acquiring the ability to apply innovative technologies in the design of the built environment

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K7_W02] knows and understands the rules of gathering information and their interpretation as a part of project concept preparation; detailed issues related to architecture and urban planning in the field of complex design problems solving	The student knows and understands the rules of searching and selecting information about emerging technologies and innovative building materials during the development of the design concept	[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge
[K7_W01] knows and understands construction, building and engineering issues related to building design; principles, solutions, constructions and building materials used in performing complex engineering tasks in the field of architectural and urban design	Student knows innovative building materials and technologies and has knowledge about their application in architectural design process	[SW2] Assessment of knowledge contained in presentation

Subject contents

New technologies in architecture: introduction, concept and role of technology. Social aspects of technological change: Actor-Network Theory

Innovative materials and technologies and their applications

Smartmaterials: nanomaterials, phase-change materials, high-performance materials

Building materials and technologies in an environmental aspect. Energy neutral architecture

Intelligent components and systems in architecture, intelligent environments. Scenarios for the future

Prerequisites and co-requisites		
Assessment methods and criteria		

Subject passing criteria	Passing threshold	Percentage of the final grade
completion of the tasks	100.0%	100.0%
