

Subject card

Subject name and code	Management simulation game, PG_00056971						
Field of study	Engineering Management						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			English		
Semester of study	6	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		Martyna Kostrzewa				
	Teachers		Martyna Kostrzewa				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	16.0	0.0	0.0	0.0	24
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		6.0		70.0	100
Subject objectives	The aim of the course is to acquire knowledge of design, modeling and optimization of technical processes and systems in the area of production planning and control. The subject uses simulation methods, which are a tool for measuring and improving technical solutions for processes carried out in the organization						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U10] uses tools to measure and improve technical solutions concerning: devices, objects, systems, processes, products and services		Student uses tools to measure and improve technical solutions relating to: production systems, processes, products and services		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_K82] is equipped to participate in lectures, seminars and laboratory classes conducted in foreign language		K6_K82 Student is prepared to participate in classes in a foreign language, including practical classes		[SK3] Assessment of ability to organize work		
	[K6_W13] has a basic knowledge of the design, modelling and optimisation of technical processes and systems		Student has basic knowledge of design, modeling and optimization of technical processes and systems in the area of production planning and control		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_W81] has knowledge of grammatical structures and lexical resources needed to communicate in foreign language in terms of general and specialist language related to field of study		Student has knowledge of grammatical structures and lexical areas in the area of business management, including process and production management		[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		

Subject contents

Organizing the business

Assigning functions to individual team members.

Defining the organization of work, goals to be achieved by individual team members and team rules.

Market research commission.

Foundation of the company

Construction of a production plant.

Assessment of market opportunities.

Formulate an overall business strategy.

Designing at least one brand for each of the target segments.

Scheduling the opening of one or two sales offices and / or an on-line center.

Entering the test market

Establishing a production schedule with changeover of the production line

Determining pay packages.

Employment of commercial staff.

Allocation of new brands to sales employees.

Fixing product prices.

Designing an advertising campaign.

Purchase of market research.

Improving activities

Improving production processes

Investments in product quality, quality control and preventive actions.

Analysis of market and operational data obtained on the test market.

	<p>If necessary - correction of the company's strategy and tactics.</p> <p>Development investments</p> <p>Improving the efficiency of the production plant by managing production capacity, expanding the production plant and implementing a quality control program.</p> <p>Consolidation of the company's strategy.</p> <p>Preparation of a business plan, searching for investment capital for the company.</p> <p>Investing in R&D to bring new product components to market.</p> <p>Raising the level of employee satisfaction (and production efficiency)</p> <p>Significantly increasing the network of sales offices and the visibility of the website.</p> <p>Extending the market offer</p> <p>Introducing new products containing R&D components.</p> <p>Further expansion into the market by increasing the number of sellers and sales channels and increasing production.</p> <p>Improving business strategy</p> <p>Analyze market, production and financial data to determine how to better meet customer needs, increase employee satisfaction, and deliver higher quality and lower price products.</p> <p>Improving the allocation of limited resources to outdo the competition.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	presentation	60.0%	30.0%
	result of the game	60.0%	70.0%
Recommended reading	Basic literature	Marketplace manual Essentials of Strategic Management, Author: Arthur A. Thompson and John Gamble 2008; marketplace-simulation.com	

	Supplementary literature	Warner M., Witzel M., Zarządzanie organizacją wirtualną. Oficyna Ekonomiczna PWP. Warszawa 2005 Pająk E. Zarządzanie produkcją. Wyd PWN 2011
