| Subject objectives                             | <ol> <li>New Urbanism and Form-based Code</li> <li>Goals of the course:</li> <li>Understanding the methods of work typical for the New Urbanism</li> <li>Familiarizing with the innovative planning tools and instruments used within the urbanism and planning practice, with a focus on form-based codes</li> <li>Understanding the interdependencies between the methodology of urban planning and form of the urban space</li> <li>Developing abilities associated with the process of shaping public spaces in the process of urban design and planning</li> </ol> |   |  |                                     |                                       |  |                   |     |  |
| Learning outcomes                              | Course outcome  |   | Subject outcome  |                                     | Method of verification                |  |                   |     |  |
|  | [K6_K81] is able to cooperate in<br>international team  |   | Understands the importance of the<br>cooperation with other team<br>members in the process of urban<br>design and planning |                                     | [SK1] Assessment of group work skills |  |                   |     |  |
|  | K6_U02  |   | Can use planning instruments associated with the form-based codes  |                                     |                                       | [SU3] Assessment of ability to<br>use knowledge gained from the<br>subject |                   |     |  |
|  | K6_U04  |   | Knows the specifics of the<br>planning instruments originating<br>from the New Urbanism movement                           |                                     |                                       | [SU4] Assessment of ability to<br>use methods and tools                    |                   |     |  |

| Subject contents                | 1. Introduction - historical backgroun  | nd of the evolution of the building law  | and urban planning regulations |  |  |  |  |  |
|---------------------------------|---|--|--------------------------------|--|--|--|--|--|
|                                 |   |  |                                |  |  |  |  |  |
|                                 | 2. New Urbanism   |  |                                |  |  |  |  |  |
|                                 | 3. Methodology of the contemporary urban planning   |  |                                |  |  |  |  |  |
|                                 | 4. Seasise and its role in the history of the contemporary urbanism. First code of urban forms  |  |                                |  |  |  |  |  |
|                                 | 5. Typology and key forms of the form-based codes   |  |                                |  |  |  |  |  |
|                                 | 6. Form-based codes - basic components - part 1   |  |                                |  |  |  |  |  |
|                                 | 7. Form-based codes - basic components - part 2   |  |                                |  |  |  |  |  |
|                                 | 8. A concept of the Transect  |  |                                |  |  |  |  |  |
|                                 | 9. A model version of the spatial forms code - SmartCode  |  |                                |  |  |  |  |  |
|                                 | 10. Form-based codes vs. zoning - similarities and differences K  |  |                                |  |  |  |  |  |
|                                 | 11. Between legal regulations nad designed-based projects - the issue of specificity of the local plans   |  |                                |  |  |  |  |  |
|                                 | 12. Form-based codes in practice  |  |                                |  |  |  |  |  |
|                                 | 13. Charrette - urban workshop  |  |                                |  |  |  |  |  |
|                                 | 14. Adaptation of the form-based codes in the polish building law and planning legislation A  |  |                                |  |  |  |  |  |
|                                 | 15. Summary - directions of further development of the form-based codes   |  |                                |  |  |  |  |  |
| Prerequisites and co-requisites |   |  |                                |  |  |  |  |  |
| Assessment methods              | Subject passing criteria  | Passing threshold  | Percentage of the final grade  |  |  |  |  |  |
| and criteria                    | final paper submission  | 50.0%  | 100.0%                         |  |  |  |  |  |
