

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Funamentals of modern physics, PG_00062728							
Field of study	Technologies for Industry 5.0							
Date of commencement of studies	October 2024		Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction			Polish		
Semester of study	4		ECTS credits			4.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Division of Physics of Disordered Systems -> Institute of Nanotechnology and Materials Engineering -> Faculty of Applied Physics and Mathematics						neering ->	
Name and surname	Subject supervisor		dr hab. inż. Jacek Dziedzic					
of lecturer (lecturers)	Teachers				-			
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	30.0	15.0	15.0	0.0		0.0	60
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in classes includ plan	didactic Participation in consultation hours		Self-study		SUM	
	Number of study hours	60		5.0		35.0		100
Subject objectives	The aim of the course is to familiarize students with the basic issues of modern physics.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_K01] is aware of the need to constantly update and enrich knowledge and practical skills, and improve professional, personal and social competences		The student is aware of the progress of science and technology and the resulting need to update and expand their knowledge and competences.			[SK3] Assessment of ability to organize work		
	[K6_W01] demonstrates knowledge and understanding of mathematics, physics, chemistry and IT tools at the level necessary to formulate and solve typical engineering and technological problems		The student formulates and solves engineering and technological problems based on the achievements of modern physics			[SW1] Assessment of factual knowledge		
	[K6_U01] applies knowledge of mathematics, physics, chemistry, IT tools and other engineering disciplines to solve theoretical, engineering and technological problems		The student applies the laws of physics to solve theoretical, engineering and technological problems.			[SU3] Assessment of ability to use knowledge gained from the subject		

Subject contents	Older quantum theory: Planck's dist	ribution; Einstein's law of photoemiss	ion; Bohr's model of the atom.				
	Introduction to quantum physics: Basic assumptions of quantum physics; matter waves; Schrödinger's equation; Heisenberg's uncertainty principle; Elementary particles and their properties; particle statistics - fermions and bosons. Pauli's exclusion principle.						
	Fundamentals of atomic and molecular physics: Atomic structure and the periodic table; Bonds; energetic rotational and vibrational states of molecules;						
	Introduction to lasers: Spontaneous and stimulated emission; optical resonators; the principle of operation of the maser and laser; Basic types of lasers and their structure.						
	Introduction to solid state physics: Bloch's theorem and energy bands in solids; semiconductors; T results of Einstein's special and general theory of relativity.						
Prerequisites and co-requisites	Course in Classical Physics and Mathematics						
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade				
	excersise test	50.0%	50.0%				
	test	50.0%	50.0%				
Recommended reading	Basic literature	Współczesna fizyka cząstek, M. Th	stek, M. Thomson, PWN, 2023				
	Supplementary literature	given during lectures					
	eResources addresses	Adresy na platformie eNauczanie:					
Example issues/ example questions/ tasks being completed							
Work placement	Not applicable
