

Subject card

Subject name and code	Electronics and electrical engineering, PG_00061903						
Field of study	Materials Engineering						
Date of commencement of studies	October 2024	Academic year of realisation of subject				2025/2026	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	3	ECTS credits				5.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Corrosion and Electrochemistry -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Krzysztof Żakowski					
	Teachers	dr hab. inż. Krzysztof Żakowski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	The student will master the basics of electrical engineering to the extent of understanding the generation, transmission and distribution of electricity and the principle of operation of selected electrical machines. The acquired knowledge will be useful in the further course of studies, in future professional work and in everyday life when using modern electrical and electronic devices.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U01] Can properly use selected analytical, simulation and experimental methods, as well as devices for measuring the fundamental properties of materials and technological processes.	The student is able to measure electrical quantities.			[SU4] Assessment of ability to use methods and tools		
	[K6_K01] Understands the need to improve professional and personal competencies; is conscious of own limitations and knows when to turn to experts, properly establishes priorities helping to accomplish tasks defined by oneself or others.	The student understands the need to improve professional skills.			[SK5] Assessment of ability to solve problems that arise in practice		
	[K6_W05] Has the knowledge of mechanics, technology and electrical engineering, including engineering graphics and using computer aid, the use of databases in the design of technological processes.	The student knows the construction and application of basic electrical engineering equipment.			[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U03] Can critically analyze and evaluate the functioning – particularly in the context of materials engineering – existing technical solutions, particularly equipment, objects, systems, processes.	The student is able to evaluate the functioning of basic electrical engineering equipment.			[SU2] Assessment of ability to analyse information		

Subject contents	<p>Lectures:</p> <ul style="list-style-type: none"> <li>• Direct current electrical circuits</li> <li>• Alternating current electrical circuits</li> <li>• Three-phase systems, connection of consumers in star and delta</li> <li>• Electrical machines</li> <li>• Electric power system, generation, transmission and distribution of electricity</li> <li>• Electrical network systems and installations</li> <li>• Basic electronic components and circuits</li> </ul> <p>Labs:</p> <ul style="list-style-type: none"> <li>• Multimeters</li> <li>• Resistance measurements</li> <li>• Measurements of resistance to grounding</li> <li>• Diode and rectifiers</li> <li>• Operational amplifier</li> <li>• Prototype circuits</li> <li>• Residential electrical installations</li> </ul>											
Prerequisites and co-requisites	General electrical engineering knowledge. Fundamentals of physics.											
Assessment methods and criteria	<table border="1" data-bbox="448 792 1489 898"> <thead> <tr> <th data-bbox="448 792 794 831">Subject passing criteria</th> <th data-bbox="794 792 1141 831">Passing threshold</th> <th data-bbox="1141 792 1489 831">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 831 794 860">colloquium</td> <td data-bbox="794 831 1141 860">60.0%</td> <td data-bbox="1141 831 1489 860">50.0%</td> </tr> <tr> <td data-bbox="448 860 794 889">laboratory</td> <td data-bbox="794 860 1141 889">100.0%</td> <td data-bbox="1141 860 1489 889">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	colloquium	60.0%	50.0%	laboratory	100.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
colloquium	60.0%	50.0%										
laboratory	100.0%	50.0%										
Recommended reading	Basic literature	not applicable										
	Supplementary literature	not applicable
