

Subject card

Subject name and code	Inorganic chemistry laboratory, PG_00061896						
Field of study	Materials Engineering						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Inorganic Chemistry -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Jarosław Chojnacki					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	10.0		35.0	75	
Subject objectives	Confrontation of knowledge on reactivity of basic classes of inorganic substances: elements, acids, bases and salts with laboratory practice. Consolidation of material learnt during the first semester of Chemistry I. Basics of classical qualitative analysis of inorganic ions.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U01] Can properly use selected analytical, simulation and experimental methods, as well as devices for measuring the fundamental properties of materials and technological processes.	The Student selects a method of analysis which allows unambiguous identification of the sample			[SU4] Assessment of ability to use methods and tools		
	[K6_W02] has knowledge of physics and chemistry, useful for formulating and solving simple problems within the scope of materials science	Gain knowledge about chemical reactivity of substances in solutions: salts, acids, alkalis and properties of popular metals			[SW1] Assessment of factual knowledge		
	[K6_K01] Understands the need to improve professional and personal competencies; is conscious of own limitations and knows when to turn to experts, properly establishes priorities helping to accomplish tasks defined by oneself or others.	Understands the importance of different behaviour of separate ions and mixtures. Appreciates the need to extend the skills gained			[SK5] Assessment of ability to solve problems that arise in practice		

Subject contents	<p>During the laboratory classes a student examines over one hundred processes of chemical reaction. On the basis of literature he chooses proper reactions and while examining them, he identifies the presence of specific ions in solutions. Next, he examines the basic chemical and physical properties of the material received for further analysis.</p> <p>Later, the student plans to conduct proper experiments. Finally, he analyses their processes and on this basis, he identifies the received sample for analysis.</p> <p>1. Qualitative analysis of selected cations (Ag^+, Hg_2^{2+}, Pb^{2+}, Cu^{2+}, Hg^{2+}, Cd^{2+}, Bi^{3+}, Ni^{2+}, Co^{2+}, Fe^{3+}, Zn^{2+}, Mn^{2+}, Al^{3+}, Ca^{2+}, Ba^{2+}, K^+, NH_4^+, Na^+, Mg^{2+}).</p> <p>2. Qualitative analysis of selected anions. (Cl^-, Br^-, I^-, $[\text{Fe}(\text{CN})_6]^{4-}$, $[\text{Fe}(\text{CN})_6]^{3-}$, NO_2^-, CH_3COO^-, NO_3^-, MnO_4^-, SO_3^{2-}, CO_3^{2-}, $\text{C}_2\text{O}_4^{2-}$, BO_3^{3-}, $\text{C}_4\text{H}_4\text{O}_6^{2-}$, PO_4^{3-}, $\text{S}_2\text{O}_3^{2-}$, CrO_4^{2-}, SO_4^{2-})</p> <p>3. Qualitative analysis of selected inorganic compounds: acids, bases, salts and metals.</p>								
Prerequisites and co-requisites	None								
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="456 629 790 663">Subject passing criteria</th> <th data-bbox="802 629 1141 663">Passing threshold</th> <th data-bbox="1145 629 1481 663">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 669 790 714">Sum of points for introductory tests and analyses</td> <td data-bbox="802 669 1141 714">55.0%</td> <td data-bbox="1145 669 1481 714">100.0%</td> </tr> </tbody> </table>	Subject passing criteria	Passing threshold	Percentage of the final grade	Sum of points for introductory tests and analyses	55.0%	100.0%		
Subject passing criteria	Passing threshold	Percentage of the final grade							
Sum of points for introductory tests and analyses	55.0%	100.0%
