

Subject card

Subject name and code	ECONOMIC GROWTH AND CONVERGENCE THEORIES, PG_00060800						
Field of study	Economic Analytics						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		English		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Katedra Ekonomii -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Aleksandra Parteka				
	Teachers		dr hab. inż. Aleksandra Parteka				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		6.0		24.0	75
Subject objectives	Explains the most important theoretical models of economic growth and convergence as well as computational (analytical) methods used in their empirical verification.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U04] prepares and presents convincing, professional presentations of analysis results, with their in-depth interpretation		prepares and presents the results of analyzes in a convincing manner, along with their in-depth interpretation		[SU5] Assessment of ability to present the results of task		
	[K7_W01] identifies in-depth the phenomena related to the field of study and the theories describing them and possible analytical methods		identifies phenomena related to the theory of growth and convergence based on known theories and possible analytical methods		[SW1] Assessment of factual knowledge		

Subject contents	Lectures:		
	<div>1. Introduction. Stylised facts about economic growth.</div> <div>2. How to measure growth and convergence. Types of convergence.</div> <div>3. Polarisation of development in the world</div> <div>4. History of economic growth and convergence process - part I</div> <div>5. History of economic growth and convergence process - part II</div> <div>6. Models of economic growth - introduction</div> <div>7. Production function and its properties.</div> <div>8. Solow growth model - part I (C-D production function, Solow diagram)</div> <div>9. Solow growth model - part II (growth accounting, Solow decomposition)</div> <div>10. Solow growth model - part III (extensions)</div> <div>11. Growth models - extensions (model MRW, AK)</div> <div>12. Endogenous growth models - human capital, technology, public spending, trade, institutions.</div> <div>13. Empirical studies on real convergence - part I</div> <div>14. Empirical studies on real convergence - part II.</div> <div>15. Test</div> <div>Computer labs: practical analysis of topics discussed during the lectures, the use of real statistical data.</div> <div>1. Introduction - key data sources and growth facts.</div> <div>2. Databases - part I</div> <div>3. Databases - part II</div> <div>4. Analytical dataset construction</div> <div>5. Analysis of growth trends and polarisation of development around the world.</div> <div>6. Alternative measures of growth.</div> <div>7. Mathematical and statistical measures of convergence.</div> <div>8. Solow model analysis - part I</div> <div>9. Solow model analysis - part II</div> <div>10. Real convergence - empirical analysis part I</div> <div>11. Real convergence - empirical analysis part II</div> <div>12. Growth models - empirical evidence</div> <div>13. Endogeneous factors of growth - empirical tests</div> <div>14. Nominal convergence analysis.</div> <div>15. Test</div>		
Prerequisites and co-requisites	Knowledge of macroeconomics and basic statistics/econometrics.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test on computational methods	60.0%	50.0%
	Exam	60.0%	50.0%

	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	Describe the properties of the Cobb-Douglas production function. Explain the Solow diagram. Define the differences between absolute and conditional convergence. Get the data on output and growth factors. Conduct an empirical convergence analysis of a selected group of economies.		
Work placement	Not applicable
