

Subject card

Subject name and code	Introduction to the experiment, PG_00063334						
Field of study	Nanotechnology						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Instytut Nanotechnologii i Inżynierii Materiałowej -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Barbara Kościelska				
	Teachers		prof. dr hab. inż. Barbara Kościelska dr inż. Szymon Winczewski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	5.0		25.0	75	
Subject objectives	<p>1. Acquisition of the ability to describe the problem, plan an experiment leading to a solution to the problem, evaluate the results of the experiment.</p> <p>2. The course also includes a computer laboratory, which will focus on learning computer tools (mainly the gnuplot program) useful in engineering practice and in the analysis and presentation of scientific data.</p>						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W09] Has knowledge of the structure and operation of scientific instruments, measuring and test equipment and in the field of planning and conducting a physical experiment and critical analysis of its results.	Knowledge of the construction and operation of simple physical devices. Ability to plan and conduct a simple physical experiment and present and analyze its results.			[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
	[K6_K04] can cooperate and work in a team, adopting different roles.	The student knows how to work in a team.			[SK1] Assessment of group work skills		
	[K6_U10] can forecast and assess potential negative biological and ecological effects of producing nanostructures on an industrial scale and their practical application.	On the example of nanotechnology, the student is able to critically assess the risks associated with new technologies			[SU2] Assessment of ability to analyse information		
	[K6_U04] can plan and conduct experiments, critically analyze their results, draw conclusions and formulate opinions. Has laboratory experience.	The student is able to plan and carry out experiments, critically analyze their results.			[SU2] Assessment of ability to analyse information		

Subject contents	<p><b>Lecture/exercises</b></p> <ol style="list-style-type: none"> <li>1. Sources of scientific and non-scientific knowledge.</li> <li>2. Measurement errors and uncertainties.</li> <li>3. Statistical distribution of measurements.</li> <li>4. Measurements and measurement uncertainties of complex quantities.</li> <li>5. Graphical and tabular presentation of measurement results.</li> <li>6. Determination of physical parameters from graphs. Linear regression method.</li> <li>7. Planning simple physical experiments.</li> <li>8. Principles of presenting measurement results. Creating a report.</li> <li>9. Principles of preparing scientific publications.</li> </ol> <p><b>Laboratory (computer laboratory)</b></p> <ol style="list-style-type: none"> <li>1. Gnuplot program - characteristics and applications.</li> <li>2. Working with the gnuplot program - interactive and batch modes.</li> <li>3. Basic gnuplot commands (set, show, plot).</li> <li>4. Creating 2D plots.</li> <li>5. Functions, variables, arithmetic operations.</li> <li>6. Handling data files.</li> <li>7. Exporting plots to graphic files.</li> <li>8. Linear regression.</li> <li>9. Statistical analysis.</li> <li>10. Fitting functions to data.</li> </ol>														
Prerequisites and co-requisites	Knowledge of mathematics at secondary school level.														
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="454 1906 796 1939">Subject passing criteria</th> <th data-bbox="801 1906 1142 1939">Passing threshold</th> <th data-bbox="1147 1906 1485 1939">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="454 1946 796 1995">Laboratory - passing all laboratory exercises.</td> <td data-bbox="801 1946 1142 1995">50.0%</td> <td data-bbox="1147 1946 1485 1995">35.0%</td> </tr> <tr> <td data-bbox="454 2002 796 2051">Lecture - examination in written form.</td> <td data-bbox="801 2002 1142 2051">50.0%</td> <td data-bbox="1147 2002 1485 2051">30.0%</td> </tr> <tr> <td data-bbox="454 2058 796 2107">exercises - examination in written form.</td> <td data-bbox="801 2058 1142 2107">50.0%</td> <td data-bbox="1147 2058 1485 2107">35.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Laboratory - passing all laboratory exercises.	50.0%	35.0%	Lecture - examination in written form.	50.0%	30.0%	exercises - examination in written form.	50.0%	35.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Laboratory - passing all laboratory exercises.	50.0%	35.0%													
Lecture - examination in written form.	50.0%	30.0%													
exercises - examination in written form.	50.0%	35.0%
