

## § GDAŃSK UNIVERSITY § OF TECHNOLOGY

## Subject card

Subject name and code	Lean Manufacturing, PG_00062997								
Field of study	Mechanical Engineering								
Date of commencement of studies	February 2023		Academic year of realisation of subject			2023/2024			
Education level	second-cycle studies		Subject group						
Mode of study	Full-time studies		Mode of delivery			at the	at the university		
Year of study	2		Language of instruction			Englis	English		
Semester of study	3		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			asses	assessment		
Conducting unit	Faculty of Mechanical Engineering and Ship Technology								
Name and surname	Subject supervisor		dr hab. inż. Jacek Kropiwnicki						
of lecturer (lecturers)	Teachers	acek Kropiwnicki							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
of instruction	Number of study hours	30.0	0.0	0.0	0.0		0.0	30	
	E-learning hours inclu			-		-			
Learning activity and number of study hours	Learning activity	Participation in classes includ plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	30		0.0		0.0		30	
Subject objectives	Learning the methods of development of production systems, process optimization strategies and change management.								
Learning outcomes	Course outcome Subject outcome Method of verification								
	[K7_W11] possesses organized knowledge useful in understanding ex-technical conditioning connected with performing the profession of an engineer and taking it into consideration in engineering practice; possesses well- established knowledge within the range of intellectual property, management and organization of manufacturing processes, including the management and life- cycle of a product		The student knows process optimization strategies, analytical methods, Lean principles and methods, change management, and Lean Manufacturing implementation strategies.			[SW1] Assessment of factual knowledge			
	[K7_U02] is able to communicate in English in professional matters within the area of technical science and, particularly, of construction and operation of machines		The student is able to communicate in English while discussing process optimization strategies, analytical methods, Lean principles and methods, change management, and Lean Manufacturing implementation strategies. The student is prepared to actively participate in a farzion			[SU1] Assessment of task fulfilment [SK3] Assessment of ability to			
	participate actively in lectures, seminars and laboratory classes conducted in foreign language		participate in lectures in a foreign language in the field of Lean Manufacturing			organize work			
Subject contents	Development of Production Systems and Lean Management. Strategies in Process Optimisation. Analytical Methods. Lean Principles and Lean Methods. Change Management. Roll-out Strategies for Lean Manufacturing. Total productive Management.								
Prerequisites and co-requisites									
Assessment methods	Subject passin	g criteria	Pass	ing threshold		Per	centage of th	e final grade	
and criteria Test			60.0%			100.0%
