

Subject card

Subject name and code	BASIC OF GENERAL TECHNOLOGY, PG_00063452						
Field of study	Biotechnology						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			1.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Chemistry and Technology of Functional Materials -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Anna Skwierawska					
	Teachers	dr hab. inż. Anna Skwierawska dr hab. inż. Andrzej Nowak					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	15	2.0		8.0		25
Subject objectives	Knowledge of basic concepts in the field of technology. The ability to describe the process using a schematic diagram and mass balance.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W101] is able to make an in-depth identification of key objects and phenomena related to the field of study, as well as theories that describe them and applicable analytical and design methods	The student independently analyzes examples of biotechnological processes. The student indicates possibilities of modifying existing processes. The student suggests changes that enable the transformation of individual chemical processes into biotechnological ones.			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge		
	[K7_K01] understands the need to constantly update knowledge based on the state of the art in accordance with the latest scientific literature, improve professional skills and the importance of teamwork	The student has the skills to design simple biotechnological processes. He can prepare conceptual diagrams and material balance of the analyzed process.			[SK1] Assessment of group work skills [SK3] Assessment of ability to organize work [SK5] Assessment of ability to solve problems that arise in practice		
Subject contents	Principles of green engineering. Chemical technology as applied science. The genesis of a new technological process. Basic raw materials and auxiliary materials in production. Chemical concept of the method. Technological concept of the method. Unit processes. Schematic and technological scheme. Mass and heat balance of the process. Technological principles. Examples of biotechnological processes.						
Prerequisites and co-requisites	Knowledge of chemical and biotechnological equipment.						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
		60.0%			100.0%		
Recommended reading	Basic literature	1. Marek Adamczak, Włodzimierz Bednarski, Jan Fiedurek, Fundamentals of industrial biotechnology, 1st edition, Polish Scientific Publishers PWN, Warsaw 2020 2. Jerzy Piotrowski, Józef Szarawara, Theoretical foundations of chemical technology, 1st edition, Scientific and Technical Publishers, Warsaw 2010					

	Supplementary literature	<ol style="list-style-type: none"> 1. Włodzimierz Bednarski, Arnold Reys, Food Biotechnology, 2nd edition, Polish Scientific Publishers PWN, WNT, Warsaw, 2020 2. Bjorn Kristiansen, Colin Ratledge, Translator: Stanisław Bielecki, Aleksander Chmiel, Andrzej Konowicz, Fundamentals of biotechnology, 1st edition, Polish Scientific Publishers PWN, Warsaw 2013
	eResources addresses	Adresy na platformie eNauczenie:
Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. On the basis of the drawing showing the technological diagram of the process, a schematic diagram should be drawn. 2. Based on a verbal description of the technological process, draw a technological and schematic diagram. 3. Prepare a mass balance based on the technological description. 4. By analyzing the technological description of the process, make a judgment about compliance with the requirements of green engineering principles and technological principles. 	
Work placement	Not applicable	

Document generated electronically. Does not require a seal or signature.
