

## Subject card

Subject name and code	Sound Reinforcement - Laboratory, PG_00048329								
Field of study	Electronics and Telecommunications								
Date of commencement of studies	February 2025		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS cred	ECTS credits		1.0			
Learning profile	general academic profile		Assessme	ent form		assessment			
Conducting unit	Department of Multimedia Systems -> Faculty of Electronics, Telecommunications and Informatics								
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Piotr Odya						
	Teachers		dr inż. Piotr Odya						
			dr inż. Karolina Marciniuk mgr inż. Wanda Ludwikowska						
Lacasa turas and mathada	Lesson type	Lecture	Tutorial	Laboratory	Projec	+	Seminar	SUM	
Lesson types and methods of instruction	Number of study hours	0.0	0.0	15.0	0.0		0.0	15	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation classes inclu-		Participation in consultation hours		Self-study		SUM	
	Number of study hours	15		2.0		8.0		25	
Subject objectives	The aim of the course is to familiarize students with the room acoustics and sound reinforcement technology and knowledge transfer in the acoustic CADs.								

Data wygenerowania: 28.10.2024 14:13 Strona 1 z 2

INC_LUQ; can perform tasks related to the field of study as well as formulate and solve problems applying recent inchweldeg of physics and other areas of science physics and other physics and other physics and other physics physics and the professional engineering extended in the professional engineering extended and non-technical aspects, make a preliminary economic and engineering extended extended and professional engineering extended extended and professional engineering extended extend	Learning outcomes	Course outcome	Subject outcome	Method of verification				
Kir_UD3  can design, according to required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and sund reinforcement systems using acoustic CADs (CATT-Acoustic and ODEON systems).   SU1  Assessment of ability to be separate to the field of study and experimental makes apply analytical simulation and experimental man and non-technical aspects, make a preliminary economic and engineering tasks specifications and experimental man and non-technical aspects, make a preliminary economic and engineering tasks (sr. agr. agr) analytical simulation and experimental man and non-technical aspects, make a preliminary economic and engineering task (Kr_UD7  can apply advanced methods of process and function support, specific to the field of study of the study of the study and experimental man and non-technical aspects, make a preliminary economic and technical analysis of choosed solutions in the field of solutions and engineering work.    Kir_UD7  can apply advanced methods of process and function support, specific to the field of study of the study o		[K7_U02] can perform tasks related to the field of study as well as formulate and solve problems applying recent knowledge of	Student designs acoustic interiors (eg. radio studios, auditoria, musical theaters, churches, etc.)	[SU1] Assessment of task fulfilment [SU4] Assessment of ability to				
required specifications, and make a complex device, facility, system for carry out a process, specific to the field of study, using suitable the field of study, using suitable materials, following engineering technologies specific to the field of study and experience gained in the professional engineering asks specifications and solving these lasts, care. apply analytical methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested solutions and engineering work.    IKT_U07] can apply advanced methods of process and function support, specific to the field of solutions and engineering work.    IKT_U07] can apply advanced methods of process and function support, specific to the field of solutions and engineering work.    IKT_U07] can apply advanced methods of process and function support, specific to the field of solutions and engineering work.    IKT_U07] can apply advanced methods of process and function support, specific to the field of solutions and engineering task.    Introduction			quality of acoustic interiors.	ISU11 Assessment of task				
formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested solutions and engineering work in the control of the		required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering	and sound reinforcement systems using acoustic CADs (CATT-	fulfilment [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to				
methods of process and function support, specific to the field of study   reinforcement system using acoustic CAD (CATT-Acoustic and ODEON systems).		formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested	(CATT-Acoustic and ODEON systems) to design and simulate acoustics of rooms and sound reinforcement systems.  The student is able to make an economic and technical analysis of choosed solutions in the field of acoustics and sound	fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to				
2. Acoustical design - "Cdeon" 3. Acoustical design - "CATT-Acoustic" 4. Room sound system design 5. Speech intelligibility testing 6. Measurement of room acoustic parameters 7. Real reinforcement system - technical tour 8. Credit for a course  No requirements  Assessment methods and criteria  Recommended reading  Basic literature  Basic literature  G. Davis, R. Jones, Sound Reinforcement Handbook, YAMAHA, Halleonard Publ. Corp., 1990. K. Blair Benson, Sound Engineering Handbook, McGraw Hill, New York, 1988; L.L. Beranek, Concert and Opera Halls.
