

## Subject card

Subject name and code	Service Platforms and Applications for NGN, PG_00048339						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	February 2025	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Teleinformation Networks -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Marcin Narloch					
	Teachers	dr inż. Marcin Narloch					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	4.0	16.0	50		
Subject objectives	Student describes realizations of service platforms for the next generation networks. Student determines correct realizations of applications fulfilling users needs in next generation networks						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W10] knows and understands, to an increased extent, the basic processes occurring in the life cycle of equipment, objects and technical systems, as well as methods of supporting processes and functions, specific to the field of study	Student knows platforms of service control and application servers solutions for services in Next Generation Networks and understands control information flows for realisation of services in NGN networks.			[SW1] Assessment of factual knowledge		
	[K7_W03] knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum	Student knows platforms of service control and application servers solutions for services in Next Generation Networks.			[SW1] Assessment of factual knowledge		

Subject contents	1. The importance of service platforms in the context of NGN 2. IMS as an example of NGN service architecture 3. The role of the IMS service control layer for providing services 4. Interworking with application layer in IMS for providing services 5. Technologies of IMS application layer development 6. The role of component-oriented architectures in applications for NGN 6. Java EE environment in programming applications for NGN 7. JAIN SLEE in the context of applications for NGN 8. Service execution environment (SLEE Container) 9. JAIN SLEE components and component interfaces 10. Standard components (Event and Activity) and their role in JAIN SLEE 11. SBB (Service Building Blocks) for providing services in JAIN SLEE 12. The notion of event and event handling in JAIN SLEE 13. Communication with environment through Resource Adaptors and Resource API 14. Standard functionalities of application server 15. Application of standard Java API for service functionality extension 16. Elements of JAIN SLEE environment management (JMX) 17. Specificity of JAIN SLEE application programming 18. Analysis of JAIN SLEE application in different telecommunication areas 19. Analysis of exemplary JAIN SLEE applications 20. SIP Servlets in the context of applications for NGN 21. SIP Servlet Container 22. Application router 23. SIP Servlet API and applications developed with SIP Servlet API 24. Specificity of SIP Servlet application programming 25. Analysis of exemplary SIP Servlet applications 26. Mobicents as an example of platform for NGN application development 27. Architecture for providing Parlay/OSA services 28. Applications using Parlay/OSA API 29. Application of Parlay X Web Services 30. Specificity of Parlay/OSA application programming 31. Analysis of exemplary Parlay/OSA applications 32. Operation systems of mobile devices 33. Specificity of application programming for mobile platforms in the context of applications for NGN								
Prerequisites and co-requisites	No requirements								
Assessment methods and criteria	<table border="1" data-bbox="451 600 1487 633"> <thead> <tr> <th data-bbox="451 600 794 633">Subject passing criteria</th> <th data-bbox="794 600 1137 633">Passing threshold</th> <th data-bbox="1137 600 1487 633">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 633 794 667">Midterm colloquium</td> <td data-bbox="794 633 1137 667">50.0%</td> <td data-bbox="1137 633 1487 667">100.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Midterm colloquium	50.0%	100.0%
	Subject passing criteria	Passing threshold	Percentage of the final grade						
Midterm colloquium	50.0%	100.0%							
Recommended reading	Basic literature								
	Material prepared by the lecturer in the form of xeroxcopy.								
	Supplementary literature
