

## Subject card

Subject name and code	Conservation Project, PG_00063671						
Field of study	Architecture						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of History, Theory of Architecture and Monument Conservation -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. arch. Grzegorz Bukal				
	Teachers		dr hab. inż. arch. Grzegorz Bukal				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	60.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		10.0		55.0	125
Subject objectives	Acquisition of architectural design skills in a conservation environment.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_K03] is ready to take responsibility for humanities, social, cultural, architectural and urban values in environmental protection and cultural heritage		is ready to take responsibility for humanities, social, cultural, architectural and urban values in environmental protection and cultural heritage		[SK5] Assessment of ability to solve problems that arise in practice		
	[K7_U05] can organize work taking into account all phases of work on the design concept		can organize work taking into account all phases of work on the design concept		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		
	[K7_W04] knows and understands the relationships between man and architecture and between architecture and the surrounding environment, and the need to adapt architecture to human needs and scale; problems of physics, technology and functions of buildings to the extent that ensures comfort of use and protection against the atmospheric factors; methods and means of implementing environmentally responsible sustainable design as well as protection and conservation of the surrounding environment		The student knows the principles of conservation ethics.		[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation		

Subject contents	<b>Conservation design:</b> The project can be carried out by individual students or in teams of two, depending on the size and scope of the task.  Task topic (optional):  <ol style="list-style-type: none"><li>Study of the adaptation of the historic object</li><li>Study of the extension of the historic building</li><li>Design study of a modern facility in the context of historical development</li><li>Study of the conservation program of the historic building</li></ol>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Conservation project	51.0%	100.0%
