

Subject card

Subject name and code	Conservation Project, PG_00063671						
Field of study	Architecture						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of History, Theory of Architecture and Monument Conservation -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. arch. Grzegorz Bukal					
	Teachers	dr hab. inż. arch. Grzegorz Bukal					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	60.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	10.0		55.0		125
Subject objectives	Acquisition of architectural design skills in a conservation environment.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_K03] is ready to take responsibility for humanities, social, cultural, architectural and urban values in environmental protection and cultural heritage	is ready to take responsibility for humanities, social, cultural, architectural and urban values in environmental protection and cultural heritage			[SK5] Assessment of ability to solve problems that arise in practice		
	[K7_U05] can organize work taking into account all phases of work on the design concept	can organize work taking into account all phases of work on the design concept			[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		
	[K7_W04] knows and understands the relationships between man and architecture and between architecture and the surrounding environment, and the need to adapt architecture to human needs and scale; problems of physics, technology and functions of buildings to the extent that ensures comfort of use and protection against the atmospheric factors; methods and means of implementing environmentally responsible sustainable design as well as protection and conservation of the surrounding environment	The student knows the principles of conservation ethics.			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation		

Subject contents	<p>Conservation design: The project can be carried out by individual students or in teams of two, depending on the size and scope of the task.</p> <p>Task topic (optional):</p> <ol style="list-style-type: none"> 1. Study of the adaptation of the historic object 2. Study of the extension of the historic building 3. Design study of a modern facility in the context of historical development 4. Study of the conservation program of the historic building 			
Prerequisites and co-requisites				
Assessment methods and criteria	Subject passing criteria		Passing threshold	Percentage of the final grade
	Conservation project		51.0%	100.0%
