

Subject card

Subject name and code	Intelligent Information Retrieval, PG_00054370								
Field of study	Informatics, Biomedical Engineering, Biomedical Engineering, Biomedical Engineering								
Date of commencement of studies	February 2025		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			3.0	3.0		
Learning profile	general academic profile		Assessment form			exam			
Conducting unit	Department of Computer Architecture -> Faculty of Electronics, Telecommunications and Informatics								
Name and surname	Subject supervisor		dr hab. inż. Julian Szymański						
of lecturer (lecturers)	Teachers		dr hab. inż. Julian Szymański						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	0.0	0.0 30.0		0.0	45		
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	45		6.0		24.0		75	
Subject objectives	introduction to								
natural language processing									
information retrieval									
	machine learning in text categorization								
	technikues								

IR7_U08] while identifying and correction methods Subject shows how to built text correction methods Subject shows specifications and solving these lassks, cain - apply hardyfical, methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested solutions and engineering work IR7_U43] can apply information IR7_U043] can apply	Learning outcomes	Course outcome	Subject outcome	Method of verification				
Ichnologies in market economy and information society conditions as well as algorithmize and computerize cognitive and decision-making processes in other areas of knowledge IKT_KO2] is ready to provide critical evaluation of received content and to acknowledge the importance of knowledge in sloving cognitive and practical problems IKT_WO3] knows and understands, to an increased existent, the construction and operating principles of methods and operating principles of principles of the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum 1. Pass conditions 2. Informatic and cognitive science 3. Intelligence, service, information - terms definitions 4. Text representation, VSM 5. Text classification - Naive bayes 6. Text classification - SVM 7. Dimension reduction 8. PCA Algorithm (SVM) Algorithm and application to LS 10. Web search engines architecture 1. Text presentation, VSM 5. Text classification in the construction of the constr		formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested						
critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical problems IK7_W03] knows and understands, to an increased exent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum Pass conditions 2. Informatic and cognitive science 3. Intelligence, service, information - terms definitions and selected specific issues - appropriate for the curriculum It is a service in the construction of the curriculum It is a service in the curri		technologies in market economy and information society conditions as well as algorithmize and computerize cognitive and decision-making processes in						
understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum 1. Pass conditions 2. Informatic and cognitive science 3. Intelligence, service, information - terms definitions 4. Text representation, VSM 5. Text classification - Naive bayes 6. Text classification - SVM 7. Dimension reduction 8. PCA Algorithm 9. SVD Algorithm and application 15.10. Web search engines architectire 11. Google and PageRank algorithm 12. HITS algorithm 13. Text clusterization 14. Natural language processing tools 15. Lexical sources: Wordnet 16. Knowledge representation methods 17. Description logic as ontology language 18. Final exam Prerequisites		critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical	I					
4. Text representation, VSM 5. Text classification - Naive bayes 6. Text classification - SVM 7. Dimension reduction 8. PCA Algorithm 9. SVD Algorithm and application to LSI 10. Web search engines architectire 11. Google and PageRank algorithm 12. HITS algorithm 13. Text clusterization 14. Natural language processing tools 15. Lexical sources: Wordnet 16. Knowledge representation methods 17. Description logic as ontology language 18. Final exam Prerequisites and co-requisites Assessment methods and criteria Subject passing criteria Passing threshold Percentage of the final grade Written exam 50.0% 50.0% Froject 50.0% Recommended reading Basic literature Mieczysław Alojzy Klopotek, "Inteligentne wyszukiwarki internetowe" Akademicka Oficyna Wydawnicza EXIT, Warszawa 2001 Ricardo Baeza-Yates Berthier Ribeiro-Neto Modern Information Retrieval Supplementary literature FABRIZIO SEBASTIANI Machine Learning in Automated Text Categorization. S. Brin, L. Page The anatomy of a large-scale hypertextual Web search engine Example issues/ example questions/ tasks being completed ### Example issues/ example questions/ tasks being completed #### Example issues/ example questions/ tasks being completed		understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues -
