

Subject card

Subject name and code	Medical imaging laboratory, PG_00053368						
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering						
Date of commencement of studies	February 2025		Academic year of realisation of subject		2025/2026		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Optional subject group Specialty subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Institute of Physics and Applied Computer Science -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Brygida Mielewska				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		8.0		27.0	50
Subject objectives	The aim of the course is to familiarize students with imaging examinations. During the course, students will have the opportunity to learn the basics of the acquisition of computed tomography and magnetic resonance images, the format of their recording and display methods. Then they will be able to perform a phantom examination on their own on scanners and a human examination on an MRI simulator. At the end, students learn about basic image analysis.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U02] can perform tasks related to the field of study as well as formulate and solve problems applying recent knowledge of physics and other areas of science		student is able to perform the phantom examination independently on scanners and the human examination on the MR simulator		[SU2] Assessment of ability to analyse information		
	[K7_W10] knows and understands, to an increased extent, the basic processes occurring in the life cycle of equipment, objects and technical systems, as well as methods of supporting processes and functions, specific to the field of study		Student is acquainted with imaging methods and basics data acquisition in CT and MR		[SW3] Assessment of knowledge contained in written work and projects		
	[K7_U12] is able, to an increased extent, to analyze the operation of components and systems related to the field of study, as well as to measure their parameters and study their technical characteristics, and to plan and carry out experiments related to the field of study, including computer simulations, interpret the obtained results and draw conclusions		student is able to plan the phantom examination on scanners and the human examination on the MR simulator		[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools		

Subject contents	<ol style="list-style-type: none">1. Introduction to the basics of imaging.2. Review of physical basics of radiological imaging using CT and MR techniques3. Presentation of the latest trends in radiology4. Getting to know the rules of work safety in the MR and CT Unit5. Phantom measurements using MR scanner6. Phantom measurements using a CT scanner7. Working on radiological consoles: getting to know the basic functions of DICOMviewer software8. Introduction to the basic parameters of MR imaging acquisition9. Image acquisition on the MRI simulator10. Analysis of images taken during classes at the UCK		
Prerequisites and co-requisites	Basic knowledge of the principles of computed tomography and magnetic resonance imaging		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project	60.0%	50.0%
	attendance	90.0%	50.0%
Recommended reading	Basic literature	<ol style="list-style-type: none">1) Radiologia. Diagnostyka obrazowa RTG, TK, USG i MR. Redaktor naukowy: Bogdan Pruszyński, Andrzej Cieszanowski, Wydawnictwo Lekarskie PZWL 20152) https://brain.fuw.edu.pl/edu/index.php/Obrazowanie_Medyczne3) From picture to proton Donald W. McRobbie, Elizabeth A. Moore, Martin R. Prince, Martin J. Graves
