GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Programming languages, PG_00058047		
Field of study	Technical Physics		
Date of commencement of studies	October 2024	Academic year of realisation of subject	2024/2025
Education level	first-cycle studies	Subject group	Obligatory subject group in the field of study
			Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	3.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Instytut Fizyki i Informatyki Stosowanej -> Faculty of Applied Physics and Mathematics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr Maciej Kuna	
	Teachers		

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	45	5.0	25.0	75

Subject objectives	Student learns procedural programming in the selected programming language C .

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W05] has knowledge of programming methodology and techniques, and the use of selected IT tools in physics and technology	The student can write programs in the C language using appropriate libraries.	[SW3] Assessment of knowledge contained in written work and projects
	[K6_U03] knows programming languages and can use basic software packages	The student is able to program in C language.	[SU1] Assessment of task fulfilment
	[K6_K01] understands the need to learn and improve professional and personal competencies, inspires and organizes other people's learning process	The student understands the need to learn and get to know well-known technologies.	[SK2] Assessment of progress of work

Subject contents	Lecture: Classification, similarities, and differences between programming languages. Introduction to programming in C language. Programming technique using procedural programming languages. Classification and description of the basic libraries used in programming in C. Discussion of the lexical units occurring in C. Classification and description of the main control blocks in C, C. Discussion of the syntax and mode of action: functions, tables, and pointers. Description of the preprocessor and its fundamental directives. Classification and description of operations on files. Action on strings. Discussion of the structure, union, and bit-fields. Exercises in the computer laboratory: the lecture contents are realized in the practical examples.

Prerequisites and co-requisites	Basic knowledge of operating systems Unix / Linux and MS Windows.

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	A written knowledge test of the lecture	50.0%	20.0%
	Two tests of the practical skills of programming	50.0%	80.0%

Recommended reading	Basic literature	B.W. Kernighan, D.M. Ritchie, C Programming Language", Prentice Hall C.L. Tondo, S.E. Gimpel, The C Answer Book: Solutions to the Exercises in "The C Programming Language", Prentice Hall I. Sommerville, Software Engineering", Addison Wesley "C Programming", from Wikibooks, the open-content textbooks collection Stroustrup Bjarne, "The C++ Programming Language", Pearson Education (US) David Beazley, Brian K. Jones, "Python Cookbook. Recipes for Mastering Python 3.", 3rd Edition, O'Reilly Media
