GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Object-oriented programming languages I, PG_00060217		
Field of study	Obiektowe języki programowania I		
Date of commencement of studies	October 2024	Academic year of realisation of subject	2025/2026
Education level	first-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish
Semester of study	3	ECTS credits	1.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Division of Theoretical Physics and Quantum Informaton -> Institute of Physics and Applied Computer Science -> Faculty of Applied Physics and Mathematics -> Wydziały Politechniki Gdańskiej		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Patryk Jasik	
	Teachers	dr inż. Patryk Jasik	

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	0.0	0.0	0.0	0.0	15

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	15	2.0	8.0	25

Subject objectives

Presentation of the ideology of the object-oriented programming.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_W05] has knowledge of programming methodology and techniques, and the use of selected IT tools in physics and technology	The student knows the foundations of object-oriented programming.	[SW1] Ocena wiedzy faktograficznej
[K6_U03] knows programming languages and can use basic software packages	The student creates computer programs using object-oriented techniques.	[SU1] Ocena realizacji zadania
[K6_K01] understands the need to learn and improve professional and personal competencies, inspires and organizes other people's learning process	The student uses continuously developed object-oriented programming languages to create computer software.	[SK5] Ocena umiejętności rozwiązywania problemów występujących w praktyce

Subject contents

Software quality and the main goals of the object-oriented programming. Criteria of object orientation. Modularity. Approaches to reusability. Object-based decomposition. Object-oriented software construction. Abstract data types. The static structure: classes. The run-time structure: objects. The client-supplier relationship. Inheritance. Generic classes.

Prerequisites and co-requisites

Knowledge from the course Programming Languages.

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
A written knowledge test of the lecture	50.0%	100.0%

Recommended reading

Basic literature	B. Meyer *"Object-Oriented Software Construction"*, Prentice Hall 1997
Supplementary literature	B. D. McLaughlin, G. Pollice, D. West, "Head First Object-Oriented Analysis and Design", O'Reilly Media 2006
eResources addresses	

Example issues/ example questions/ tasks being completed	1. List the main goals of object-oriented programming and briefly describe them. 2. Describe in detail the concept of generics and present an appropriate example. 3. Provide two definitions of object-oriented programming and explain their meaning. 4. What is an abstract data type? Describe its specification in detail. 5. Give the definition of a class and describe the characteristics it may possess. Present a scheme for their classification.
Practical activites within the subject	Not applicable
