

Subject card

Subject name and code	Network Security Management, PG_00053895							
Field of study	Informatics							
Date of commencement of studies	October 2024		Academic year of realisation of subject		2026/2027			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	6		ECTS credits			3.0		
Learning profile	general academic profile		Assessme	Assessment form		exam		
Conducting unit	Department of Computer Communications -> Faculty of Electronics, Telecommunications and Informatics							
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Krzysztof Gierłowski					
	Teachers	dr inż. Krzysztof Gierłowski						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0		45
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	45		1.0		29.0		75
Subject objectives	 The aim of the course is to acquiant students in theory and practice with: basic security mechanisms of IT systems, security solutions which can be applied to mitigate threats, and to form the attitude to look at security as a continuous process (security management). 							

Data wygenerowania: 22.11.2024 01:31 Strona 1 z 3

Course outcome	Subject outcome	Method of verification			
[K6_W44] knows and understands, to an advanced extent, architecture, design principles and methods of hardware and software support for local and distributed information systems, including computing systems, databases, computer networks and information applications, as well as the principles of human-computer interaction, the operation and evaluation criteria of data processing, storage and transfer methods, including computational algorithms, artificial intelligence and data mining as well as standards and methods of IT systems administration, monitoring of processes and robustness to undesirable phenomena and activities	Student knows current IT systems security solutions, complete with their characteristics, requirements for their deployment and offered functionality.	[SW1] Assessment of factual knowledge			
[K6_U07] can apply methods of process and function support, specific to the field of study	Student knows current IT systems security solutions, is capable of choosing them according to identified threats.	[SU2] Assessment of ability to analyse information			
[K6_U09] can carry out a critical analysis of the functioning of existing technical solutions and assess these solutions, as well as apply experience related to the maintenance of technical systems, devices and facilities typical for the field of studies, gained in the professional engineering environment	Student is capable of configuring known security measures applicable to computer networks.	[SU1] Assessment of task fulfilment			
[K6_W03] knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum	Student knows the limitations of popular network solutions from security point of view, is capable of proposing mitigation techniques.	[SW1] Assessment of factual knowledge			
Basic security mechanisms and security requirements for IP networks. Filtration and separation of IP traffic (VLAN, tunneling, firewall). Digital certificates and PKI. Cryptographic protection of network traffic (TLS). Network monitoring. Access control solutions (RADIUS). Network remote access (VPN). Use of hardware cryptographic devices and biometry. Role of network security policy. Security maintenance. Security management of information systems.					
Basic familiarity with computer netwo	orks and IP networks in particular.				
Subject passing criteria	Passing threshold	Percentage of the final grade			
exam	50.0%	50.0%			
lab		50.0%
