

## Subject card

Subject name and code	Applications of AI methods in enterprise, PG_00045376						
Field of study	Data Engineering						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2027/2028		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			English		
Semester of study	7	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Informatics In Management -> Faculty of Management and Economics -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Jakub Chabik				
	Teachers		dr inż. Jakub Chabik				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		4.0		51.0	100
Subject objectives	The aim of the course is to acquaint students with the possible applications of artificial intelligence in the enterprise						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W06] classifies the acquired information, assessing its usefulness in solving the formulated problems		The student knows and understands techniques and solutions related to applications of AI in business, including its adoption, penetration, efficient use and mitigation of AI-related risks		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U07] uses information technologies to improve the acquisition, analysis and processing of data in business applications		The student is able to create technological and business solutions using artificial intelligence		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		
	[K6_K01] demonstrates awareness of legal, ethical and cultural diversity issues, making socially responsible decisions		The student can prepare and run the presentation in front of senior business practitioners convincing them about applicability, viability and profitability of their solution using AI		[SK1] Assessment of group work skills [SK5] Assessment of ability to solve problems that arise in practice		
Subject contents	Course content – lecture 1.What is AI? Why is it important to apply AI in enterprise? 2.AI state of the art and its prospects 3.Delivering value. Business models and their applicability with AI. 4.Data sources. Importance of data quality. Data bias and limitations of data. 5.AI governance and roadmapping. 6.Financing innovative startups. 7.Building smart, innovative enterprise.						
	Course content – laboratory Building concept of innovative, AI-driven enterprise Designing business model canvas Designing architecture Preparing business case Public presentation and defense						

Prerequisites and co-requisites	No requirements		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Online Test	50.0%	40.0%
	Final presentation	50.0%	30.0%
	Individual assignments	50.0%	20.0%
	Group presentation	50.0%	10.0%
Recommended reading	Basic literature	Marek Tłuczek, "Jak sztuczna inteligencja zmieni twoje życie", Helion2024 Feliks Kurp, "Sztuczna inteligencja od podstaw", Helion 2024 Yuval Noah Harari, "Nexus. A Brief History of Information Networks from the Stone Age to AI", Sandycove 2024	
	Supplementary literature	Ethan Mollick, "Co-Intelligence: Living and Working with AI", Ebury 2024 Aleksandra Przegalińska, Tanilla Trantioro "Przenikanie umysłów", Wyd. Campus AI	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Proposing an AI-based business model - Creating a financial plan - Developing competitive advantages - Defining data management - Final presentation		
Practical activities within the subject	Not applicable
