

Subject card

Subject name and code	Software Licensing, PG_00054185						
Field of study	Informatics						
Date of commencement of studies	February 2025		Academic year of realisation of subject		2025/2026		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Computer Architecture -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Tomasz Boiński				
	Teachers		dr inż. Tomasz Boiński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	15.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	The subject aims at informing students about legal background of using OS software and make them aware of the need to follow them.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems		Student differentiate software licences and their impact on the software development		[SU1] Assessment of task fulfilment		
	[K7_U07] can apply advanced methods of process and function support, specific to the field of study		Student can correctly select open software components to realize computer processes		[SU2] Assessment of ability to analyse information		
	[K7_U09] can carry out a critical analysis of the functioning of existing technical solutions and assess these solutions, as well as apply experience related to the maintenance of advanced technical systems, devices and facilities typical for the field of studies, gained in the professional engineering environment		Student can critically analyze legal aspect of the software and can match software components correctly aligned in term of legal conditions		[SU3] Assessment of ability to use knowledge gained from the subject		
	[K7_W04] knows and understands, to an increased extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or other elements or programmable devices specific to the field of study, and organization of work of systems using computers or such devices		Student knows and understands impact of software licenses on software development and ability to use certain compoents		[SW1] Assessment of factual knowledge		

Subject contents	1. Open Source a Free Software 2. Different kind of software licenses 3. Management of a distributed software development project 4. Rules of bundling software into different Linux distributions 5. Development cycle of Linux distributions 6. Positive and negative aspects of Closed and Open Source 7. Intellectual property and patent law 8. Models of software patents in different countries 9. Open Source based commercial applications and systems 10. Formats and protocols standardization process 11. Perspectives for Open Source 12. Final test		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Midterm colloquium	50.0%	50.0%
	Presentation	50.0%	50.0%
